IN-PERSON AND LIVE-STREAMING OPPORTUNITIES

JUNE 29-JULY 2

Saybrook Point Resort and Marina
Old Saybrook, Connecticut

2025

OVERVIEW

This four-day course will provide tips for improving diagnostic skills in interpreting a wide range of commonly performed abdominal imaging exams. Our subspecialty faculty brings you their insights and expertise for analyzing hepatic and biliary MRI, gynecological sonography, renal and prostate MRI, thyroid sonography, and CT and MR of the gastrointestinal tract. Each presentation was chosen to highlight imaging pitfalls and provide participants with practical tips they can immediately incorporate into their practice.

COURSE OBJECTIVES

Upon completion of this activity, participants should be able to:

- Effectively utilize diagnostic imaging modalities to evaluate hepatic, biliary, gastrointestinal, renal, gynecological, genitourinary, and thyroid pathology
- Provide a full range of differential diagnoses for hepatic, biliary, gastrointestinal, renal, gynecological, genitourinary, and thyroid disorders
- Integrate appropriate imaging protocols to assess hepatobiliary, gastrointestinal, renal, gynecological, and genitourinary disorders into clinical practice
- Recognize the appearance of complications following abdominal surgery and treatment for prostate carcinoma
