

URGENT WORKFLOW

- Triggers for nursing:
 - If $StO_2 < 30$. Specifically, time zero = the first minute when StO_2 hits 30. If it remains 20-40 for 30 minutes → notify **Dr. Nawar Latif (267) 586-9871**. Dr. Latif/Dr. Porrett/Dr. O'Neill to assess (see below).
 - If StO_2 decreases by 30 points within 2 hours notify Dr. Latif. Set baseline and two hour value by averaging the value over 10 minutes.
- Evaluation by Dr. Latif/Dr. Porrett/Dr. O'Neill
 1. Reposition probe, look at BP, ask if she has been repositioned etc
 2. If no change in assessment 15 minutes after initial notification.
 - a. Bedside US by Dr. Eileen Wang (if available). If not available bedside formal ultrasound by radiology.
 3. If not reassured by ultrasound
 - a. To OR for exam
