

Julian Mihai

Chief Information Security Officer of Penn Medicine

Julian Mihai is serving as the Chief Information Security Officer at Penn Medicine, University of Pennsylvania Health System, a leading academic medical center based in Philadelphia, PA. Julian is an information security leader with extensive experience in the industry. He is responsible for all aspects of the enterprise cybersecurity program across clinical, research, and education lines of business. Prior to joining Penn Medicine, he held multiple senior and technical leadership roles in enterprise cybersecurity and technology at the Cleveland Clinic, HCSC/Blue Cross Blue Shield of IL, Microsoft, Motorola, and several technology startups.

Julian positions cybersecurity as a key enabler of the organization's mission, in addition to its more traditional role in risk management. He has helped multiple organizations transform lagging security functions into cutting-edge cybersecurity programs that drive competitive advantage. He is passionate about collaboration with the security community to disrupt the status quo and leapfrog the industry into the future. As a thought leader, he enjoys advising security technology companies, as well as speaking at leading security and healthcare technology conferences on emerging topics in cybersecurity.

Julian holds an M.B.A. from the University of Chicago Booth School of Business, and a M.S. and B.S. in Computer Science from the Polytechnic University of Bucharest.

Patient Care

Penn Medicine's physicians, nurses, and staff provide exceptional, personalized care to patients with a wide range of medical conditions. Using state-of-the-art equipment and data science, our multidisciplinary clinical teams work together to ensure that patients' needs are addressed from multiple perspectives. Pharmacists, social workers, as well as nutrition and rehabilitation professionals, are all part of the care team along with doctors and nurses.

Education

The Perelman School of Medicine — established in 1765 — is consistently ranked among the nation's top academic medical schools by U.S. News & World Report. Penn Medicine offers students an innovative, comprehensive curriculum that prepares them to become leading physicians and scientists in the United States and around the world. The community of alumni numbers over 25,160 living and working across the globe.

Research

Penn Medicine's researchers take an interdisciplinary approach to better understand the fundamental mechanisms of disease, which leads to more precise and personalized treatments. Faculty from dozens of institutes, centers, and departments work in teams spanning the 11 other schools at the University of Pennsylvania, including experts in informatics, bioengineering, and health policy.
