

John P. Donohue

Vice President of Information Services - Entity Services

John P. Donohue is the Vice President of Entity Services at Penn Medicine, Information Services. John is responsible for leading the Entity Services group; which includes a number of seasoned technology executives, as well as the onsite teams that support Penn Medicine's many entities. These entity technology groups are responsible for managing the business and facilitating the technology relationship between Operations and Information Services. Each entity group is comprised of an Entity Information Officer and resources that support clinical engineering, platform, and network technology at the entities. Additionally, John is the IS executive driving technology innovation for the construction of the new patient pavilion project, which is expected to open in late 2021.

Mr. Donohue is a seasoned health care IT Executive with over 30 years of experience which includes: extensive senior executive and customer interaction, understanding complex business requirements, identifying technology solutions, developing and executing IT strategic plans. He is recognized as a proactive leader who builds and develops high performance teams that are committed to excellence in the delivery of IT services and solutions.

Prior to joining Penn Medicine, John held IT vice president roles at both Covance (a \$4 billion Clinical Research Organization) and Children's Hospital of Philadelphia (Number one ranked Pediatric Hospital in the country). John holds a BS in Business Management from University of Phoenix.

Patient Care

Penn Medicine's physicians, nurses, and staff provide exceptional, personalized care to patients with a wide range of medical conditions. Using state-of-the-art equipment and data science, our multidisciplinary clinical teams work together to ensure that patients' needs are addressed from multiple perspectives. Pharmacists, social workers, as well as nutrition and rehabilitation professionals, are all part of the care team along with doctors and nurses.

Education

The Perelman School of Medicine — established in 1765 — is consistently ranked among the nation's top academic medical schools by U.S. News & World Report. Penn Medicine offers students an innovative, comprehensive curriculum that prepares them to become leading physicians and scientists in the United States and around the world. The community of alumni numbers over 25,160 living and working across the globe

Research

Penn Medicine's researchers take an interdisciplinary approach to better understand the fundamental mechanisms of disease, which leads to more precise and personalized treatments. Faculty from dozens of institutes, centers, and departments work in teams spanning the 11 other schools at the University of Pennsylvania, including experts in informatics, bioengineering, and health policy.
