## I. INTRODUCTION

---

### **PURPOSE AND METHODOLOGY**

This report summarizes the results of an assessment of the health status and health care needs of residents of the Hospital of the University of Pennsylvania (HUP) service area. The needs assessment was conducted by Public Health Management Corporation, a private non-profit public health institute. The purpose of the needs assessment is to identify and prioritize community health needs so that the hospital can develop strategies and implementation plans that benefit the public as well as satisfy the requirements of the Affordable Care Act.

This introduction includes a definition of the community assessed in the report, the demographic and socioeconomic characteristics of the residents, and the existing health care resources followed by II. Needs Assessment Process and Methods; III. Findings; and IV. Unmet Community Health Needs. Tables, maps, and a list of community members who participated in the needs assessment are included in the Appendices.

Quantitative information from the U.S. Census, Pennsylvania Department of Health vital statistics, and the Southeastern Pennsylvania Household Health Survey was analyzed for the hospital's service area using the Statistical Program for Social Sciences (SPSS). Frequency distributions were produced for variables for multiple years of data so trends over time could be identified and described. The unmet health care needs for this service area were identified and prioritized by comparing the health status, access to care, health behaviors, and utilization of services for residents of the service area to results for the county and state and the Healthy People 2020 goals for the nation. In addition, for Household Health Survey measures, tests of significance were conducted to identify and prioritize unmet needs.

PHMC also collaborated with the participating hospitals to identify individuals living and/or working in the communities in the hospitals' service areas who could provide input to the needs assessment as community members, public health experts, and as leaders or persons with knowledge of underserved racial minorities, low income residents, and/or the chronically ill. (For a list of the names, titles, organizations, and area of expertise of community meeting participants, see Appendix A). The participating hospitals and PHMC worked together to obtain meeting venues, contact potential participants, and encourage attendance. Meeting participants were not compensated. Input from the community meeting participants, including county and local health department officials and public health experts, was used to further identify and prioritize unmet needs, local problems with access to care, and populations with special health care needs.

Qualitative information from the community meeting was analyzed by identifying and coding themes common to participants, and also themes that were unique. The resulting analysis was organized into major topic areas related to health status, access to care, special population needs, unmet needs, and health care priorities.

### **PUBLIC HEALTH MANAGEMENT CORPORATION QUALIFICATIONS**

Public Health Management Corporation (PHMC) is a 501(c)(3) non-profit corporation that was founded in 1972 to address problems in the organization and delivery of health and social services. PHMC is a

nonprofit public health institute that creates and sustains healthier communities and envisions a healthy community for all. PHMC uses best practices to improve community health through direct service, partnership, innovation, policy, research, technical assistance, and a prepared workforce.

PHMC's Research and Evaluation Group (REG) was uniquely qualified to provide comprehensive CHNA services to DVHC's not-for-profit member hospitals and facilities. It is the only public health institute in Pennsylvania, has many years' experience collaborating with health care stakeholders, and can facilitate the participation of these diverse groups as required by the ACA. PHMC staff are public health experts who have conducted many CHNAs over the past twenty years for hospitals, health departments, foundations, and other non-profits.

A list of community and population assessments PHMC has completed includes:

- Philadelphia Health Care Trust Needs Assessment, 2011
- School District of Philadelphia Head Start Needs Assessment, 2010
- Jewish Federation of Greater Philadelphia Older Adult Needs Assessment, 2010
- Main Line Area Older Adults Needs Assessment, 2010
- William Penn Foundation Youth Development Initiative Population Studies, 2006, 2008, 2010
- National Nursing Centers Consortium Northeast Philadelphia Needs Assessment, 2009
- Latino Youth Needs Assessment, 2009
- National Children's Study Montgomery County Vanguard Center Needs Assessment, 2008
- Planned Parenthood of Bucks County LGBTQ Needs Assessment, 2007
- Project HOME North Philadelphia Needs Assessment, 2006
- Children's Hospital of Philadelphia Early Head Start Needs Assessment, 2003 and 2006
- Philadelphia Corporation for Aging Older Adults Needs Assessment, 2004
- North Penn (Montco) Community Health Special Populations Needs Assessment, 2003
- North Penn (Montco) Community Health Needs Assessment, 2002
- Brandywine Health Foundation Community Needs Assessment, 2002
- Philadelphia Chinatown Health Needs Assessment, 2001
- Philadelphia Latino Community Health Needs Assessment, 2001
- Burlington County, NJ Homeless Veterans Needs Assessment, 2001
- Phoenixville Community Health Foundation Special Populations Needs Assessment, 2000
- American Red Cross (SEPA Chapter) Needs and Impact Assessments, 1999
- Berwick, Pennsylvania Community Health Needs Assessment, 1999
- East Parkside Needs Assessment, 1999
- Phoenixville Community Health Foundation Needs Assessment, 1999
- City of Philadelphia Office of Housing and Community Development Elderly Housing Needs Assessment, 1997
- Presbyterian Foundation Assisted Living Assessment of West Philadelphia, 1997
- Five County (NJ) Elderly Health Needs Assessment, 1997
- Suburban Camden County Health Needs Assessment, 1997
- Bucks County Community Health Needs Assessment - Quantitative Analysis, 1994; Update, 1997
- Cumberland, Gloucester, and Salem Counties Health Needs Assessments, 1996
- Presbyterian Foundation Assisted Living Assessment of South and North Philadelphia, 1996
- Montgomery County Health Department Maternal and Child Health Needs Assessment - quantitative data analysis, 1996
- Haddington Area Needs Assessment, 1996

- Partnership for Community Health in the Lehigh Valley - implementation phase, 1996
- Delaware Valley Health Care Council Regional Health Profile, 1996
- City of Camden Needs Assessment, 1996
- Paoli Memorial Hospital Needs Assessment, 1994
- Northeast Philadelphia Partnership for a Healthier Community - qualitative data analysis, 1994
- Misericordia Hospital Community Health Needs Assessment, 1993
- Crozer-Keystone Health System, Delaware County Needs Assessment - quantitative data analysis, 1993
- Chester County Title V Maternal and Child Health Needs Assessment , 1993
- Chester County Maternal and Child Health Consortium Needs Assessment , 1993
- Bucks County Title V Maternal and Child Health Needs Assessment , 1993

PHMC's CHNA qualifications also include the Southeastern Pennsylvania Community Health Data Base ([www.CHDBdata.org](http://www.CHDBdata.org)), which provides an unmatched set of information on local community health needs that can be used to develop focused findings supported by reliable data. These data can also be used in developing priorities and rationales for strategic plans that are ACA compliant.

The biennial SEPA Household Health Survey collects information on more than 13,000 residents (children, adults, and seniors) living in the five-county SEPA region. The survey is the longest running community health survey in the United States, as well as the largest regional survey of its kind.

REG staff Francine Axler and Lisa R. Kleiner are the co-directors of the community health needs assessment.

**Francine Axler, Senior Research Associate.** Since 1989, Francine has been actively involved in the field of public health and health promotion, specifically in the collection and dissemination of health status, health behaviors, and utilization of health services data for residents of Southeastern Pennsylvania. Francine is particularly focused on teaching health and human service providers how to utilize community level health data to develop needed, effective and targeted health promotion programs for vulnerable populations. Francine directs PHMC's Community Health Data Base ([www.CHDBdata.org](http://www.CHDBdata.org)), one of the largest, local health surveys of its kind in the country and assists 400+ agencies with using data to plan interventions. Francine has a under graduate degree in sociology and a graduate degree in public health education.

**Lisa Kleiner, Senior Research Associate.** For the past twenty-five years, Lisa has worked on a broad range of evaluation, research, and technical assistance projects. Lisa has conducted and coordinated over 25 population and community needs assessments focusing on older adults, racial/cultural minorities, persons with behavioral health needs, homeless families, maternal and child health and other at-risk groups and communities. In addition to this expertise, Lisa has provided training and technical assistance to over 200 organizations to enable them to build their capacity to define and measure program outcomes and impact, tailoring the technical assistance to the specific needs of the organization and staff. Lisa has a law degree and a graduate degree in social work.

### Collaborative Process

In February 2011, Delaware Valley Healthcare Council of HAP (DVHC), the membership association for hospitals in the five-county region of southeastern Pennsylvania, established a Community Health Needs Assessment Workgroup to assist hospitals in:

- Understanding Affordable Care Act (ACA) requirements and Internal Revenue Service guidance around community health needs assessments.
- Identifying the best resources, tools, and services for conducting needs assessments.

The Workgroup consisted of representatives from the following collaborating hospitals, health systems, and organizations:

| <b>Hospitals in Collaboration</b>           |
|---|
| Abington Health                             |
| Aria Health                                 |
| Bucks County Health Improvement Partnership |
| The Children's Hospital of Philadelphia     |
| Crozer-Keystone Health System               |
| Einstein Healthcare Network                 |
| Holy Redeemer                               |
| Jefferson Health System                     |
| Magee Rehabilitation Hospital               |
| Main Line Health                            |
| Mercy Health System of SEPA                 |
| Penn Medicine (UPHS)                        |
| St. Mary Medical Center                     |
| Temple University Health System             |

The 24-member workgroup included representatives from 13 hospitals and health systems representing 35 (70 percent) of 48 DVHC-member not-for-profit hospital facilities in Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties. The group held a series of meetings to review ACA requirements with policy experts from the American Hospital Association and consider the types of resources that might be needed to conduct needs assessments.

Under the workgroup’s guidance, DVHC developed a scope of work to define the research services and other resources which hospitals might need to assist them in conducting community health needs assessments. Based on the scope of work, DVHC issued a request for proposal to identify highly qualified research partners who could support hospitals in conducting needs assessments.

After a rigorous evaluation process that included extensive input from workgroup members, Public Health Management Corporation (PHMC) was selected as the most appropriate research partner. PHMC’s selection was due in part to their Community Health Data Base’s in-depth, zip-code-level health information for the five-county region. In addition, many hospitals are familiar with this resource and are or have been database subscribers.

With direction and guidance from the workgroup, DVHC and PHMC then collaborated to develop the overall approach to conducting needs assessments for hospitals wishing to participate in the program. Twenty-seven DVHC member facilities (see attached listing) participated in the program. Twenty-seven DVHC member facilities participated in the program, as listed below.

Abington Memorial Hospital  
Lansdale Hospital  
The Children's Hospital of Philadelphia  
Crozer-Chester Medical Center  
Delaware County Memorial Hospital  
Springfield Hospital  
Taylor Hospital  
Doylestown Hospital  
Eagleville Hospital  
Einstein Medical Center Philadelphia

Penn Presbyterian Medical Center

## COMMUNITY DEFINITION

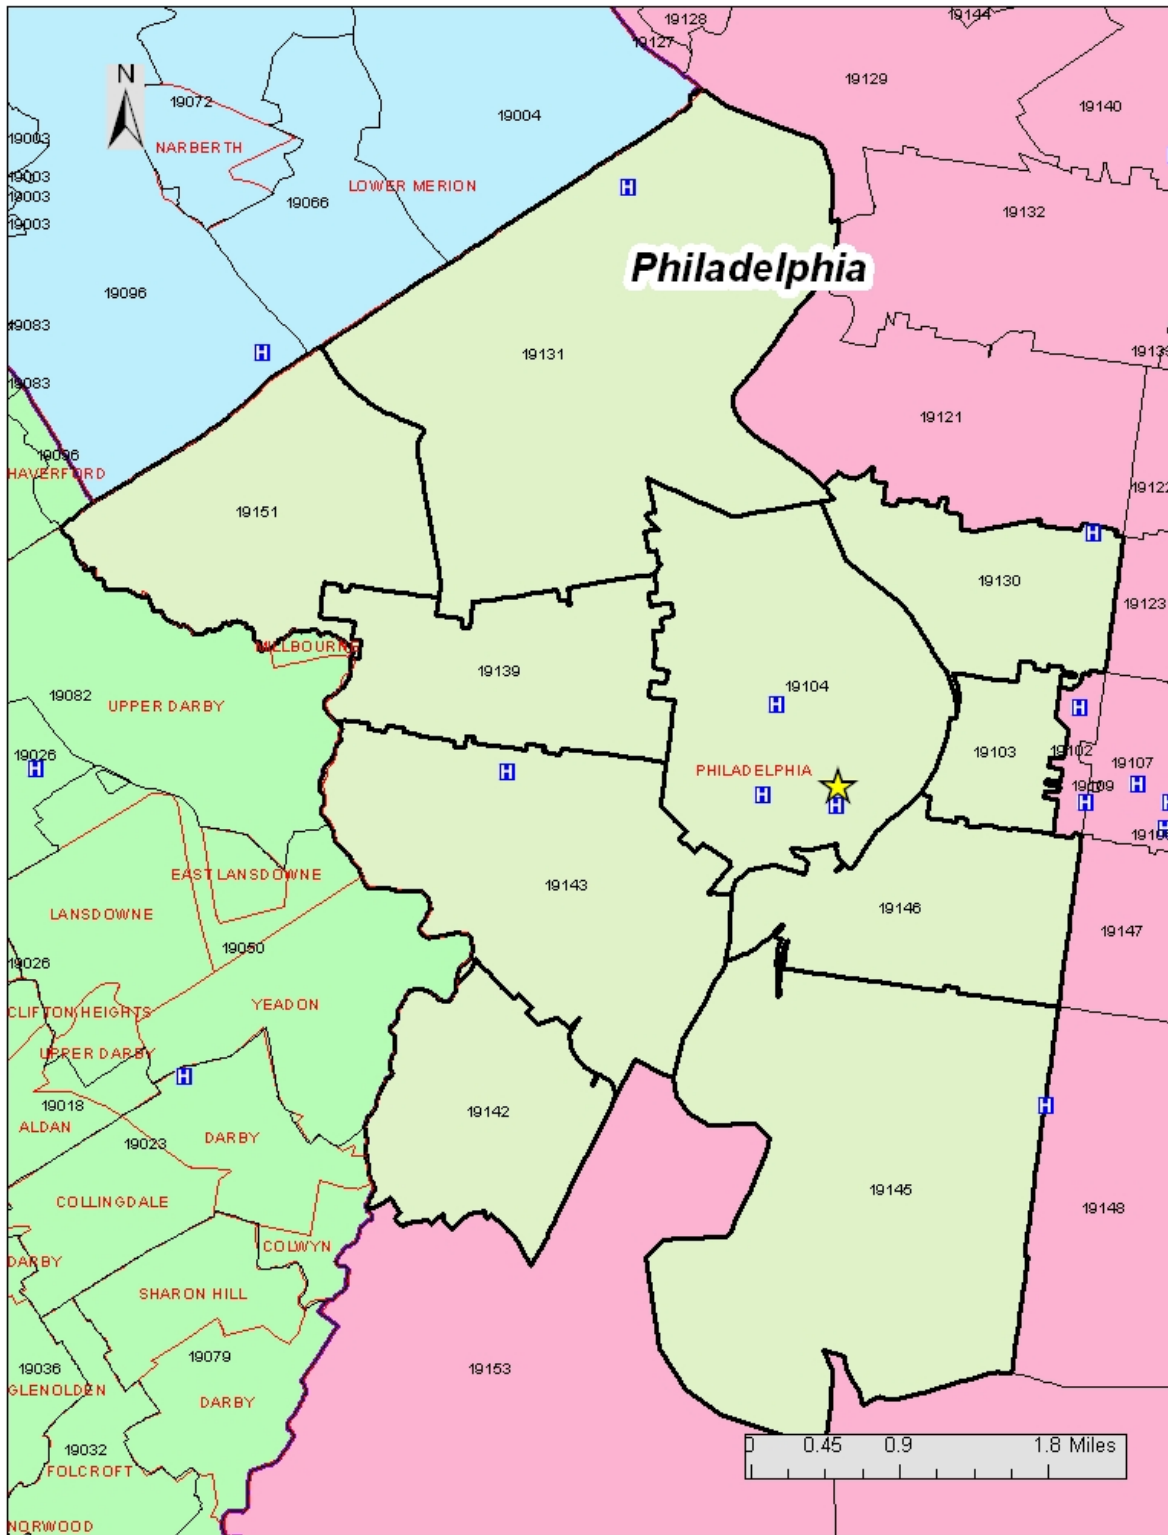

HUP is located in Philadelphia County, Pennsylvania. The hospital's service area (2010 Pop. **389,800**)<sup>1</sup> was defined as the community for the purposes of this assessment. The HUP service area includes the following ZIP codes:

| HUP Service Area   |
|--|
| 19103, 19104, 19130, 19131, 19139, 19142, 19143, 19145, 19146, 19151 |

---

<sup>1</sup>Source: Nielsen-Claritas Pop-Facts Database and 2010 U.S. Census.

## COMMUNITY DEMOGRAPHICS

This report includes a description of demographic and socioeconomic characteristics of the residents of the Hospital of the University of Pennsylvania's (HUP) service area, as these characteristics are strong indicators of access to health care and good health. Please see Appendix B for all Census data and tables.

### Population Size

**The total population of HUP's service area decreased to approximately 389,800 residents in 2010 from 397,000 residents in 2000.**

- The service areas' population is estimated to increase in 2013 (to approximately 394,800 residents) and 2018 (to approximately 401,800 residents).

### *Demographic Characteristics*

#### Age

In HUP's service area, **slightly more than one-fifth of residents are between the ages of 0-17 (21%), 45% are 18-44, nearly one-quarter are 45-64 (22%), and 12% are 65 or older.**

- When comparing to 2000, the service area saw an increase in the percentage of residents ages 45-64 and a decrease in the percentage of those ages 0-17.
- When comparing to Philadelphia County, HUP's service area has slightly lower percentages of those ages 0-17 and 45-64, and a slightly higher percentage of those ages 18-44.
- In comparison to the state as a whole, the service area has a higher percentage of residents ages 18-44 and a lower percentage of those ages 45-64 and 65 or older.

#### Gender

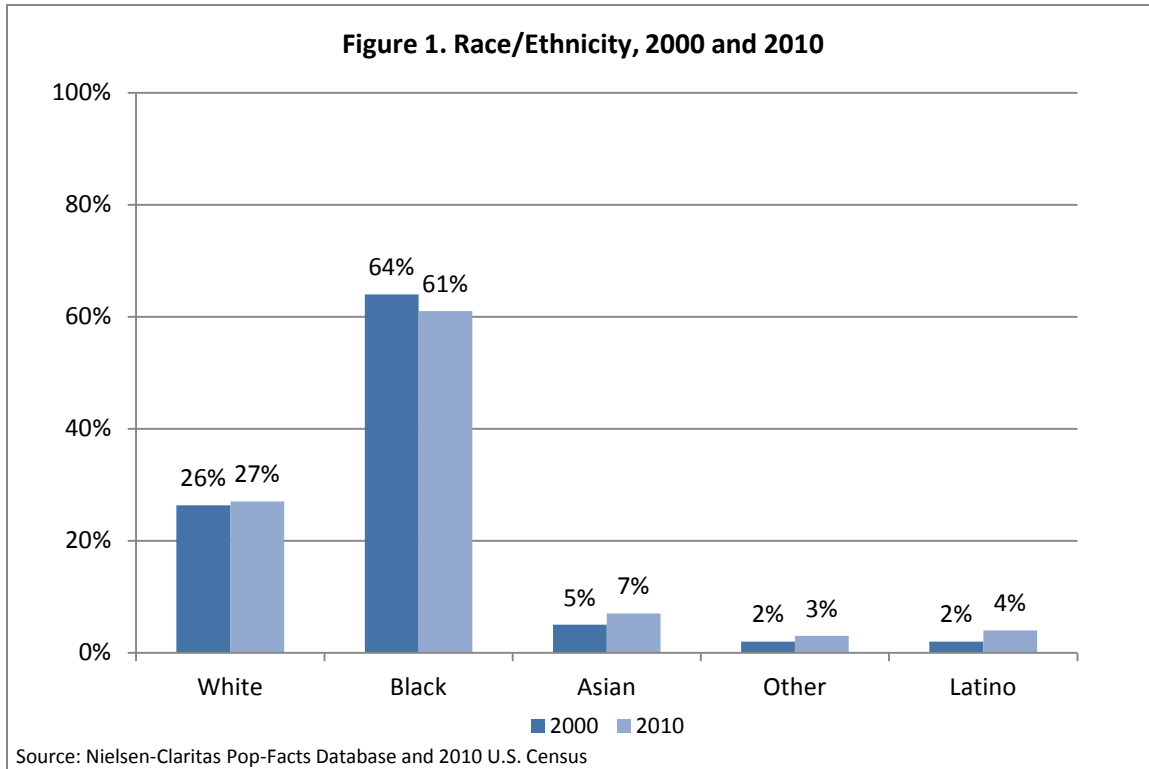

Approximately **46% of the Hospital of HUP's service area is male and 54% is female.**

- When comparing to Philadelphia County and the state, the service area has a slightly higher percentage of female residents.

#### Race/Ethnicity

**More than six in ten residents of HUP's service area identify as Black (61%), more than one-quarter identify as White (27%), 7% identify as Asian, 3% identify as Latino, and 2% identify as an "other" race/ethnicity.**

- The service area saw small changes in the racial/ethnic identity of its population from 2000. (Figure 1)
- The percentage of those who identify as Black is projected to continue to decrease slightly through 2018, while the percentages of those who identify as Asian and Latino are estimated to increase.
- In comparison to Philadelphia County, the service area has a higher percentage of Black residents and lower percentages of White and Latino residents.
- The service area has a substantially higher percentage of Black residents and a substantially lower percentage of White residents when compared to Pennsylvania as a whole.

*Latino Origin*

When looking at Latino origin, **HUP service area residents most commonly identify as Puerto Rican**, followed by those of an “other” Latino origin, and less than one percent of residents who identify as Mexican and Cuban.

- The percentages of Puerto Rican residents and those who identify as an “other” Latino origin are estimated to continue to increase slightly through 2018.
- The service area has a substantially lower percentage of Puerto Rican residents when compared to Philadelphia County and a slightly lower percentage compared to the state.

*Asian Origin*

In HUP’s service area, **approximately 7% of residents identify as Asian**.

- **Service area residents most commonly identified as Chinese, Vietnamese and Indian.**
- When comparing to the county, the service area has comparable percentages of Chinese, Indian, and Vietnamese residents.
- Looking at the state, the service area has higher percentages of Chinese, Indian, and Vietnamese residents.

Language Spoken at Home

**The majority of residents in HUP’s service area speak English at home (86%);** 6% of residents speak an “other” language at home, 4% speak Spanish, and 4% speak an Asian language.

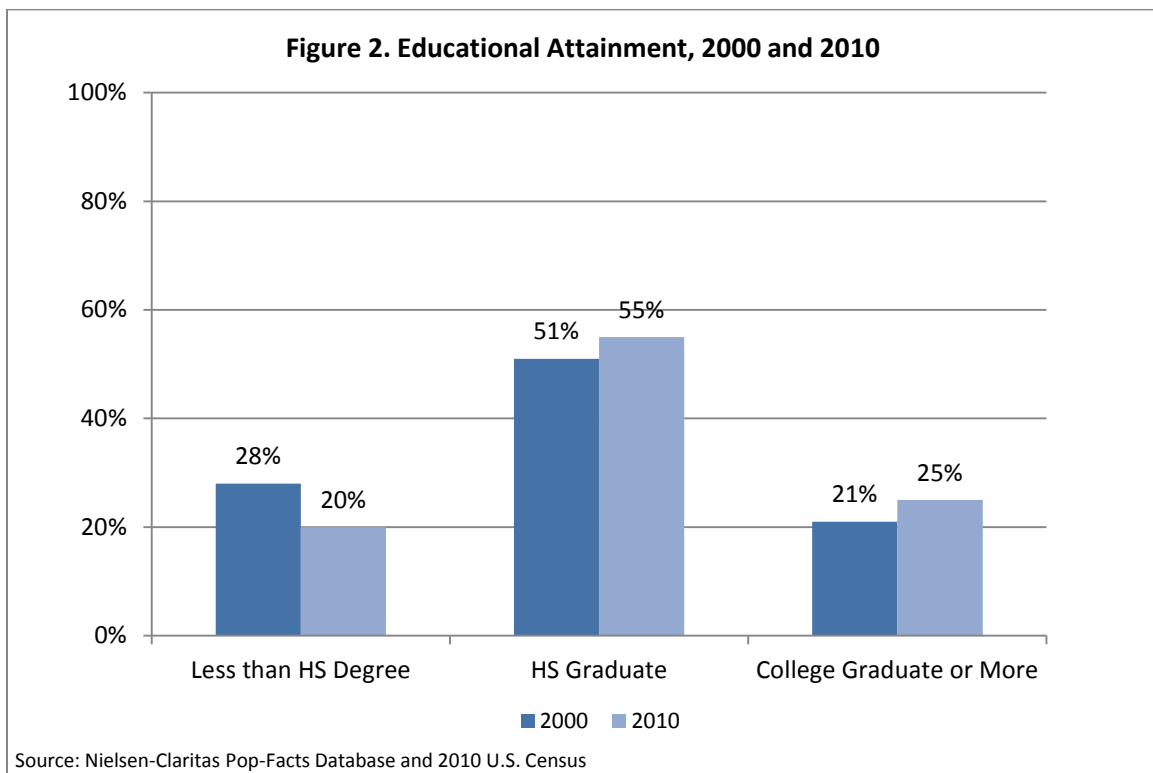

## ***Socioeconomic Indicators***

### Education

In HUP's service area, **one-fifth of residents have less than a high school degree (20%), more than half have graduated from high school (50%), and one-quarter have a college degree or more (25.1%).**

- The service area saw improvement in educational attainment from 2000. (Figure 2)
- Residents of the service area are slightly less likely to have less than a high school degree and graduate from high school compared to the county, but more likely to have a college degree or more.
- When compared to the state, the service area has a higher percentage of those who have less than a high school degree and a lower percentage of those with a high school degree or more.

### Employment

**Approximately 87% of resident of HUP's service area are employed and 13% are unemployed.**

- The service area has a slightly higher percentage of residents who are unemployed when compared to the county and the state.

### Poverty Status

When looking at poverty status, **nearly one-quarter of families without children (22%) and more than three in ten families with children (31%) are living in poverty in HUP's service area.**

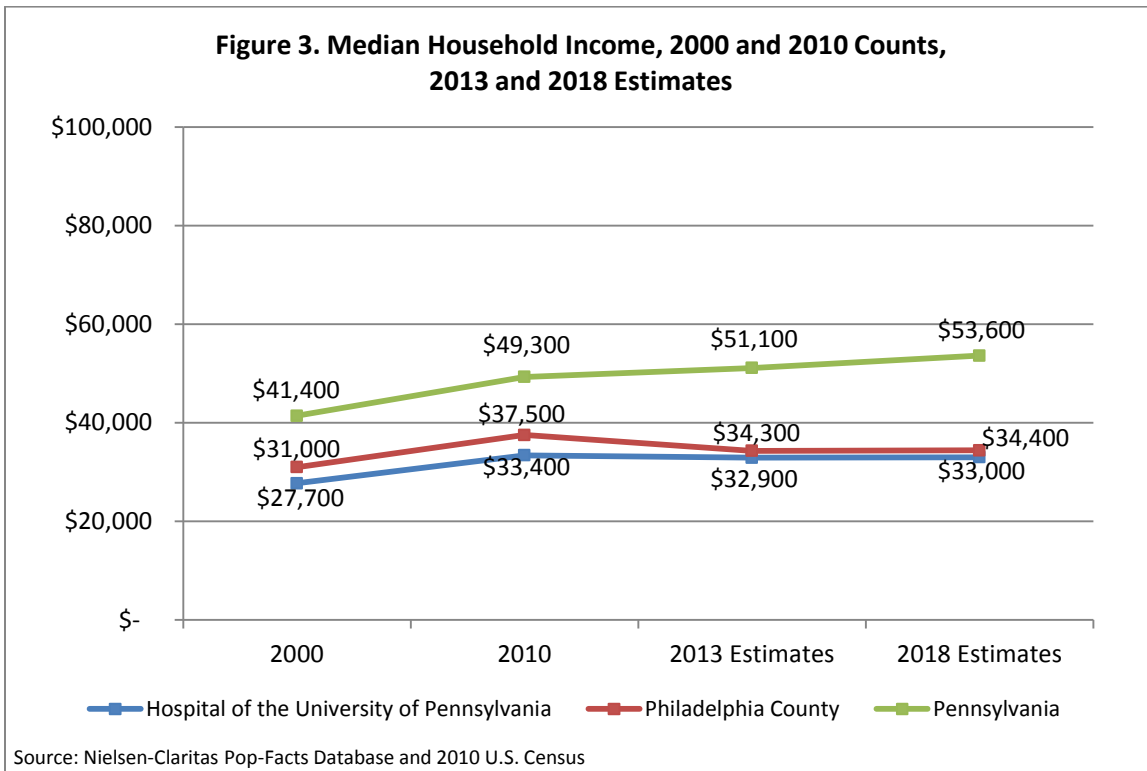

- The percentage of families without children doubled from 2000.
- Families, both with and without children, living in the service area are more likely to live in poverty compared to Philadelphia County and the state.

### Median Household Income

The 2000 median household income in the Hospital of the University of Pennsylvania’s service area was approximately \$27,700, which increased to \$33,400 in 2010.

- Although 2010 saw an increase in the median household income, the number is estimated to drop slightly in 2013.
- The median household income in the service area is slightly lower than the county, but substantially lower than the state. (Figure 3)

### Home Ownership

In HUP’s service area, **more than one-half of residents rent their home (53%) and 47% own their home.**

- The percentage of residents who rent their home in the service area is higher than the county and the state overall.

## **EXISTING HEALTH CARE RESOURCES**

The existing health and social services in the service area, and for Southeastern Pennsylvania as a whole, were inventoried for this report. Information on health and social services was obtained by internet searches and from the Yellow Pages. Health services included: acute care general hospitals; inpatient psychiatric hospitals and long-term psychiatric facilities; and rehabilitation hospitals. Skilled and intermediate care nursing facilities were not included. Health services also included community health centers and clinics, urgent care centers, and state, city, and county health department service locations. Existing social services which were inventoried included: food pantries, WIC centers, farmer's markets, and soup kitchens; community outpatient mental health and mental retardation services; senior services; social work services; homeless and domestic violence shelters; and YMCA's. These existing health care and social service resources are shown on the HUP service area maps in Appendix E. Maps of health care and social service resources are also included for Philadelphia County in Appendix E.

## II. NEEDS ASSESSMENT PROCESS AND METHODS

The steps in the needs assessment process were: defining the community; identifying existing primary and secondary data and data needs; collecting primary and secondary data; analyzing data; and preparing a written narrative report. The data acquisition and analysis are described in more detail below.

### DATA ACQUISITION AND ANALYSIS

Both primary and secondary and quantitative and qualitative data were obtained and analyzed for this needs assessment. Obtaining information from multiple sources, known as triangulation, helps provide context for information and allows researchers to identify results which are consistent across more than one data source.

#### *Data Sources and Dates*

Quantitative information for this needs assessment was obtained from sources listed below for the most recent years available.

#### **Community Health Needs Assessment Data Sources**

| <b>Data Source</b>                                     | <b>Dates</b> |
|--|--------------|
| U.S. Census of Population and Housing                  | 2000, 2010   |
| Claritas, Inc. Pop-Facts                               | 2013, 2018   |
| Pennsylvania Department of Health                      | 2005-2008    |
| PHMC Southeastern Pennsylvania Household Health Survey | 2010, 2012   |

#### PHMC Southeastern Pennsylvania Household Health Survey

The 2012 Southeastern Pennsylvania Household Health Survey questionnaire examines health status, utilization of and access to health care among adults and children in the five county area including Bucks, Chester, Delaware, Montgomery and Philadelphia counties. The survey includes many questions which have been administered and tested in national and local health surveys, including items from instruments developed by the following organizations: the National Center for Health Statistics (NCHS) for the National Health Interview Survey (NHIS), The Behavioral Risk Factor Surveillance System (BRFSS), The California Women’s Health Survey, The Social Capital Community Benchmark Survey (Kennedy School of Government, Harvard University) and The Survey on Childhood Obesity (Kaiser Family Foundation/San Jose Mercury News).

The 2012 Household Health Survey was conducted through telephone interviews with people 18 years of age and older living in 10,018 households in Southeastern Pennsylvania. All telephone households within Bucks, Chester, Delaware, Montgomery and Philadelphia counties were eligible to be selected for the sample, as were cell phone users. Households in each of the five counties were selected to guarantee representation from all geographic areas and from all population subgroups. When needed, the interviews were conducted in Spanish. A total of 1,068 interviews were conducted with adults residing in the service area, including 243 adults ages 65 and over and 167 households with a selected

child under the age of 18.

The 2012 Southeastern Pennsylvania Household Health Survey was administered for PHMC by Social Science Research Solutions, Inc. (SSRS), a research firm in Media, Pennsylvania, between May and September 2012. All interviews were administered by telephone. Most households (8,009 total) were contacted on home phones (“landlines”) using a computerized Random Digit Dialing (RDD) methodology so that households with unpublished numbers and residents who had recently moved would be included in the sample. A total of 2,009 cell phone interviews were conducted with adults in the five county area. Cell phone respondents received the same survey questionnaire as landline respondents.

The sample for this study was drawn from all telephone households in the five counties. The final sample of interviews is representative of the population in each of the five counties so that the results can be generalized to the populations of these counties. Within each selected household, the Last Birthday Method was used to select the adult respondent for the interview (with the exception of the cell phone sample). In households with more than one eligible adult, the adult who last had a birthday was selected as the adult respondent. In households with children, the person under age 18 who most recently had a birthday was selected for the child interview. The survey incorporates over-samples of people ages 60-74 and 75 and older to provide a sufficient number of interviews for separate analyses of the responses of people in these subgroups.

#### U.S. Census

This report includes data on the population of HUP service area residents, Philadelphia County residents, and Pennsylvania residents along with socio-demographic and socioeconomic characteristics for the years 2000, 2010, 2013 and 2018. Data from the 2000 U.S. Census, the 2010 American Community Survey, and the Nielsen-Claritas Pop-Facts Database were also used. The Nielsen-Claritas Pop-Facts Database uses an internal methodology to calculate and project socio-demographic and socioeconomic characteristics for non-census years, relying on the U.S. Census, the Current Population Survey, and the American Community Survey.

#### Vital Statistics

The most recent information on births, birth outcomes, deaths, and reportable diseases and conditions for residents of HUP’s service area and Philadelphia County was obtained from the Pennsylvania Department of Health, Bureau of Health Statistics and Research. Four year (2005-2008) annualized average rates for natality and mortality were calculated by PHMC. Mortality rates were age-adjusted using the Direct Method and the 2000 U.S. standard million population. The most recent (2010) morbidity information was also obtained from the state Department of Health, and rates were calculated by PHMC. Morbidity information, including information on HIV and AIDS cases, is not available at the ZIP code level and, therefore, rates are presented for the county only. The denominators for all 2005-2008 vital statistics rates for the county and state were interpolated from the 2000 and 2010 U.S. Census. The number of women ages 15-44 and the number of adolescents ages 10-17 were also interpolated from the 2000 and 2010 US Census.

## **COMMUNITY REPRESENTATIVES**

Information on the health status and health care needs of the residents of the hospital service area was also collected through community meetings with residents, public health representatives, service providers, and advocates knowledgeable about community health. The meetings were guided by a set of written questions. Two meetings were held with HUP service area residents; one in West Philadelphia on July 24, 2012 and one in Center City on July 10, 2012. A total of 30 community leaders, providers, public health representatives, and residents participated. (For a list of participants names, titles, and affiliations, please see Appendix A).

## **INFORMATION GAPS**

Quantitative information for socioeconomic and demographic information, vital statistics, and health was available at the ZIP code cluster level for the service area. To fill potential gaps in information, these data were supplemented by detailed information about the service area obtained from community meetings.

The next section, III. Findings, summarizes the results of the needs assessment process.

---

### III. FINDINGS

---

## HEALTH NEEDS OF THE COMMUNITY

### *Health Status*

The health of a community can be assessed by comparing birth outcomes, self-reported health status and health conditions, communicable disease rates, self-reported health concerns and perceptions, and mortality rates.

#### Birth Rate

There are an average of nearly 5,700 births annually to women in the Hospital of the University of Pennsylvania (HUP) service area (See Appendix C for the Vital Statistics Tables).

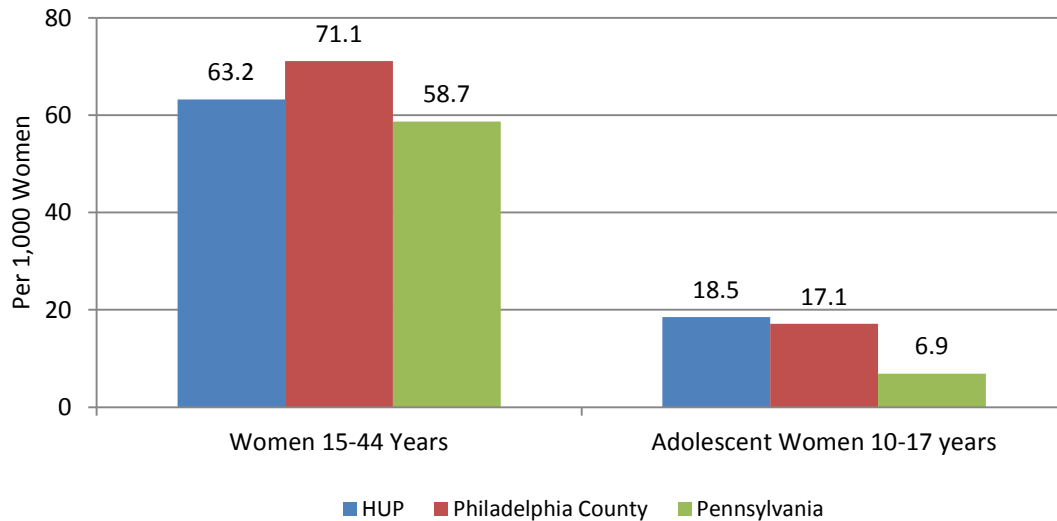

- **The birth rate in the service area (63.2 per 1,000 women 15-44 years of age) is below the Philadelphia County rate (71.1) but higher than the Pennsylvania rate (58.7)** (Figure 4).
- Within the service area, Latina women have the highest birth rate (103.1), while White women have the lowest birth rate (36.0). In general, the racial and ethnic birth rates in the service area are below the county and the state rates.

Teenage pregnancy has been associated with a number of negative birth outcomes, including prematurity and low birth weight, making it an important outcome to track.

- **In the service area, the adolescent birth rate is 18.5 per 1,000 women 10-17 years of age, which is comparable to the county rate (17.1) but nearly three times higher than the state rate (6.9)** (Figure 4).
- Within the service area, the adolescent birth rate is highest for Latina women (40.9); this rate is also higher compared with the Latina adolescent birth rate in the county (31.5) and the state (25.5).

**Figure 4. Average Annualized Birth Rates for Women 15-44 Years and Adolescent Women 10-17 Years, 2005-2008**

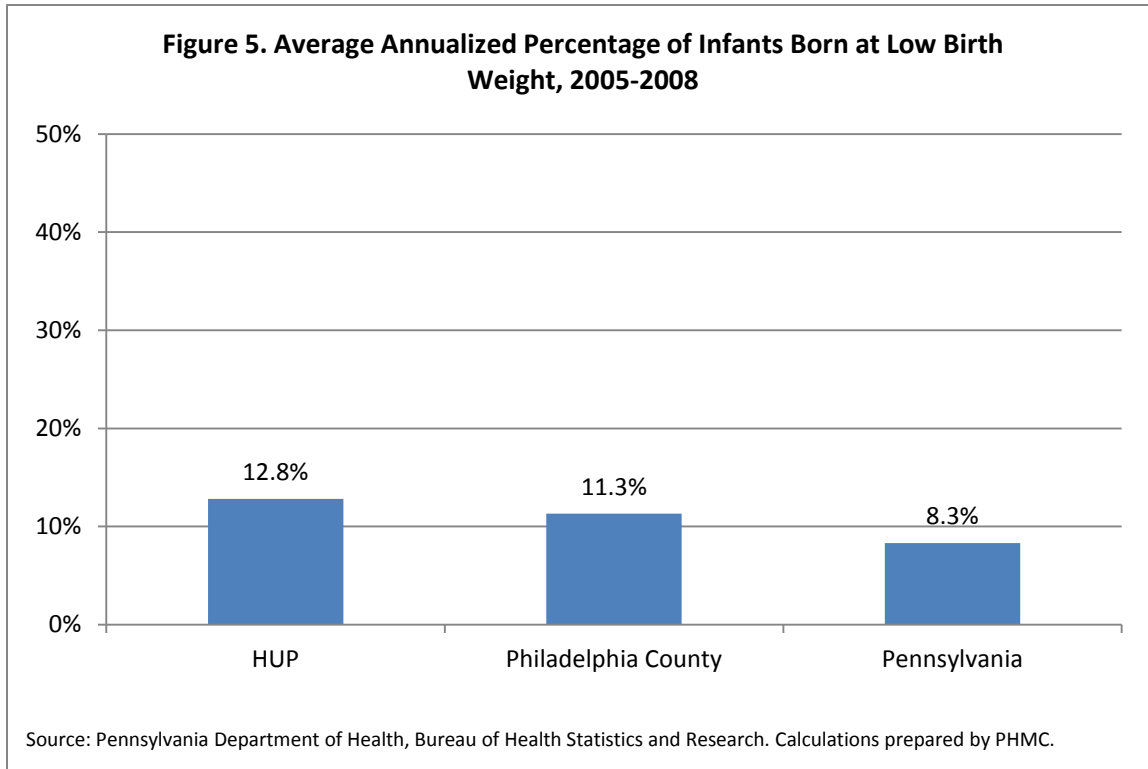

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

### Low Birth Weight

Low birth weight infants (<2,500 grams or 5lbs 8 ozs.) are at greater risk for dying within the first year of life than infants of normal birth weight.

- **In HUP's service area, 12.8% of infants are low birth weight.** This percentage is comparable with the county average (11.3%) but is higher than the state average (8.3%) (Figure 5). The percentage of infants in the service area who are born at low birth weight represents an annual average of more than 730 infants weighing less than 2,500 grams at birth.
- **In the service area, the percentage of low birth weight infants is highest among Black infants (14.4%)** and lowest for White (7.3%) and Asian (7.1%) infants. In general, the racial and ethnic percentages of infants in the service area who are born at low birth weight are comparable to the county and the state.

#### Infant Mortality Rate

**In HUP’s service area, every year an average of 76 infants die before their first birthday, representing an infant mortality rate of 13.2 infant deaths per 1,000 live births.**

- The service area’s infant mortality rate is comparable with the Philadelphia County rate (12.2) but is higher than the state rate (7.5).

#### Self-reported Health Status

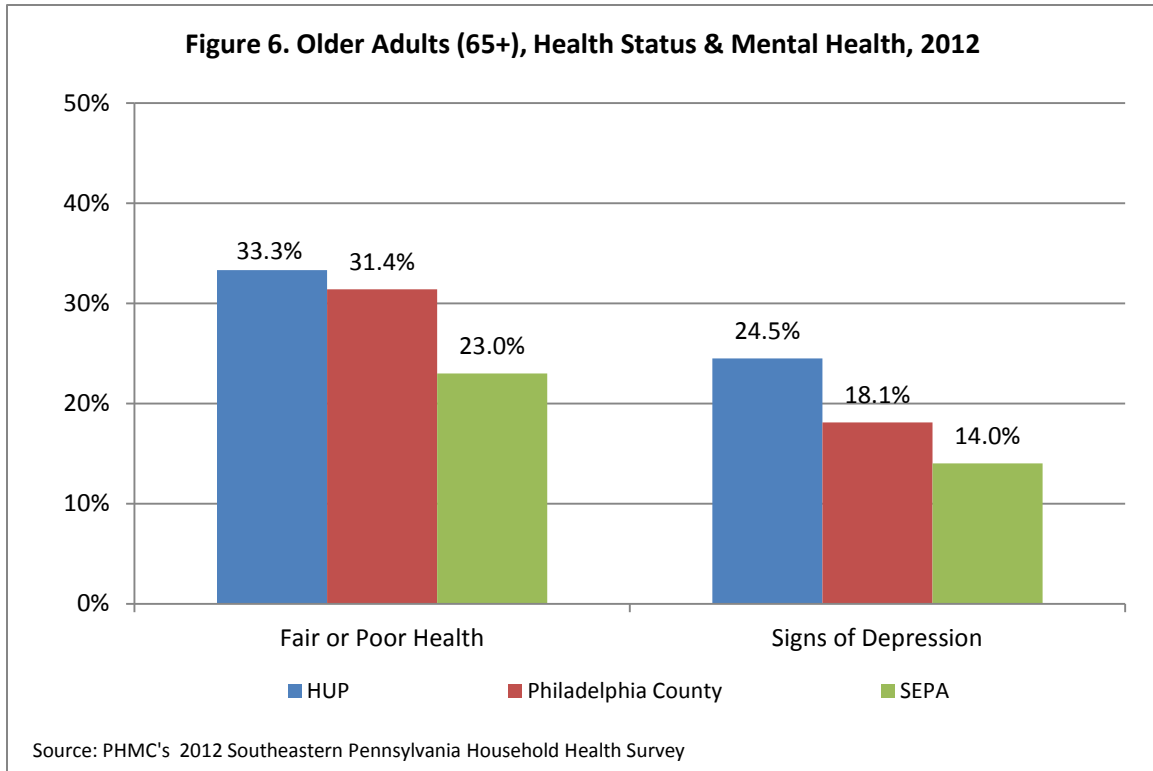

##### *Fair or Poor Health*

Self-reported health status is one of the best indicators of the population health. This measure has consistently shown to correlate very strongly with mortality rates.<sup>2</sup> In the Hospital of the University of Pennsylvania service area, more than three-quarters (**77.1%**) of adults rate their health as excellent, very good or good (See Appendix D for Household Health Survey Tables). **However, more than one-fifth of adults (22.9%) are in fair or poor health, representing 71,500 adults.** This percentage is higher than the statewide average (16.8%)<sup>3</sup> and the percentage in fair or poor health for the SEPA region as a whole (16.1%).

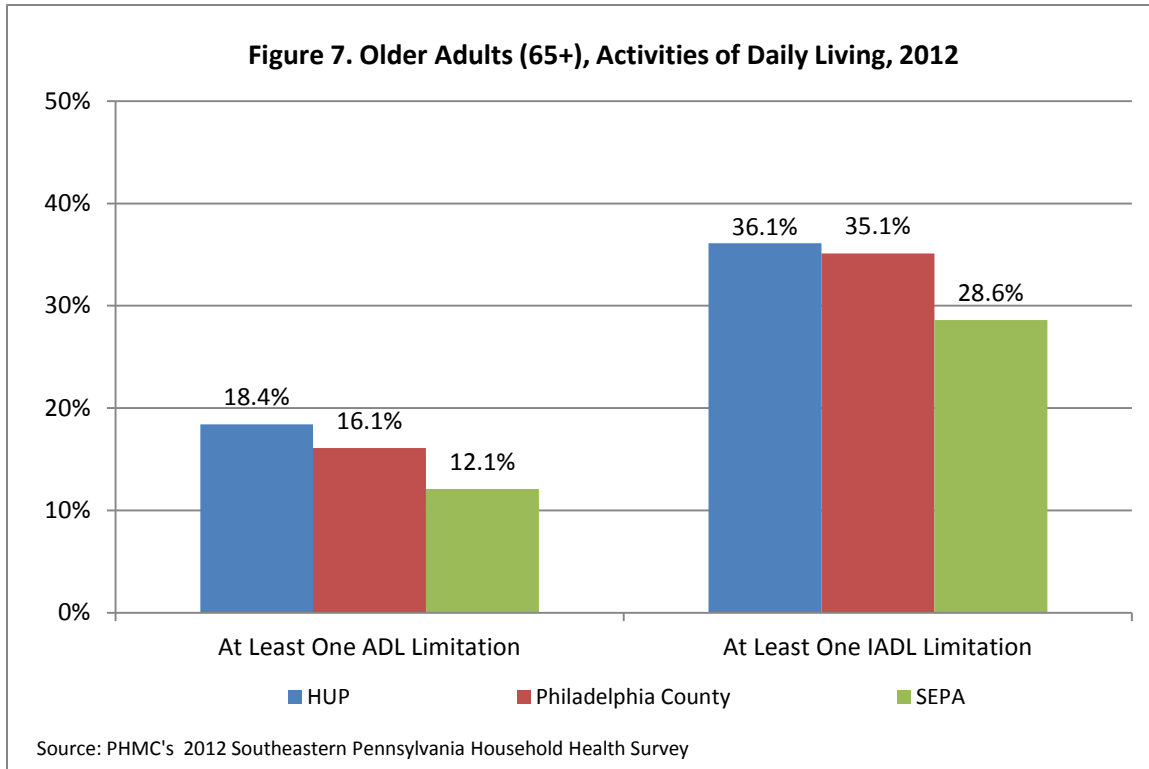

- Among older adults in the service area, one-third (33.3%) are in fair or poor health; this percentage represents 16,400 adults 65 years of age and older. (Figure 6)

<sup>2</sup> Idler EL, Benyamini Y. Self-Rated Health and Mortality: A Review of Twenty-Seven Community Studies. *Journal of Health and Social Behavior*. 1997; 21-37.

<sup>3</sup> 2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

- More than one-third (36.1%) of older adults have at least one or more instrumental activities of daily living limitations and 18.4% has at least one or more activities of daily living limitations. (Figure 7)

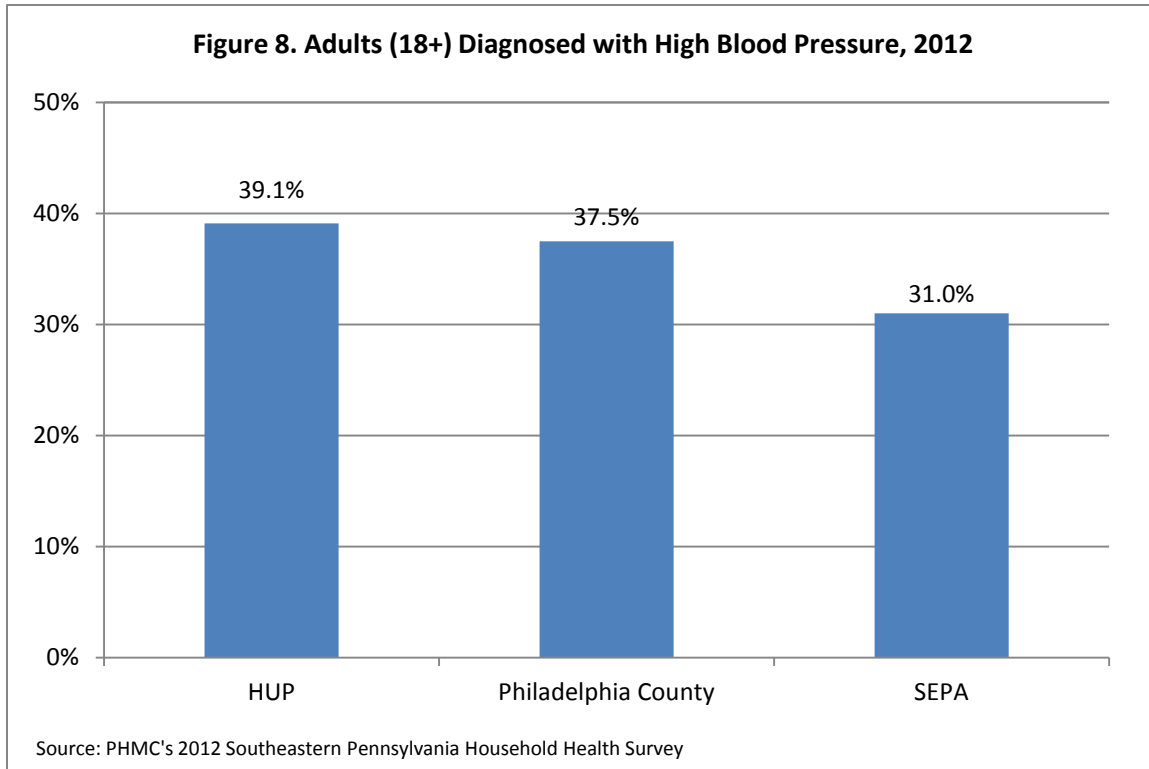

- In addition, 7.4% of children in the service area are in fair or poor health.

#### *Health Conditions*

High blood pressure, diabetes, asthma, cancer, and mental health conditions are common illnesses that require ongoing care. In the Hospital of the University of Pennsylvania service area:

- **Nearly four in ten (39.1%) of adults have been diagnosed with high blood pressure; this represents 122,400 adults.** In Pennsylvania, three in ten (31.0%) adults have high blood pressure.<sup>4</sup> The percentage of adults in the service area with high blood pressure is higher than for the region as whole (31%) but is lower than for surrounding Philadelphia (37.5%) County. (Figure 8)

<sup>4</sup>2009 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

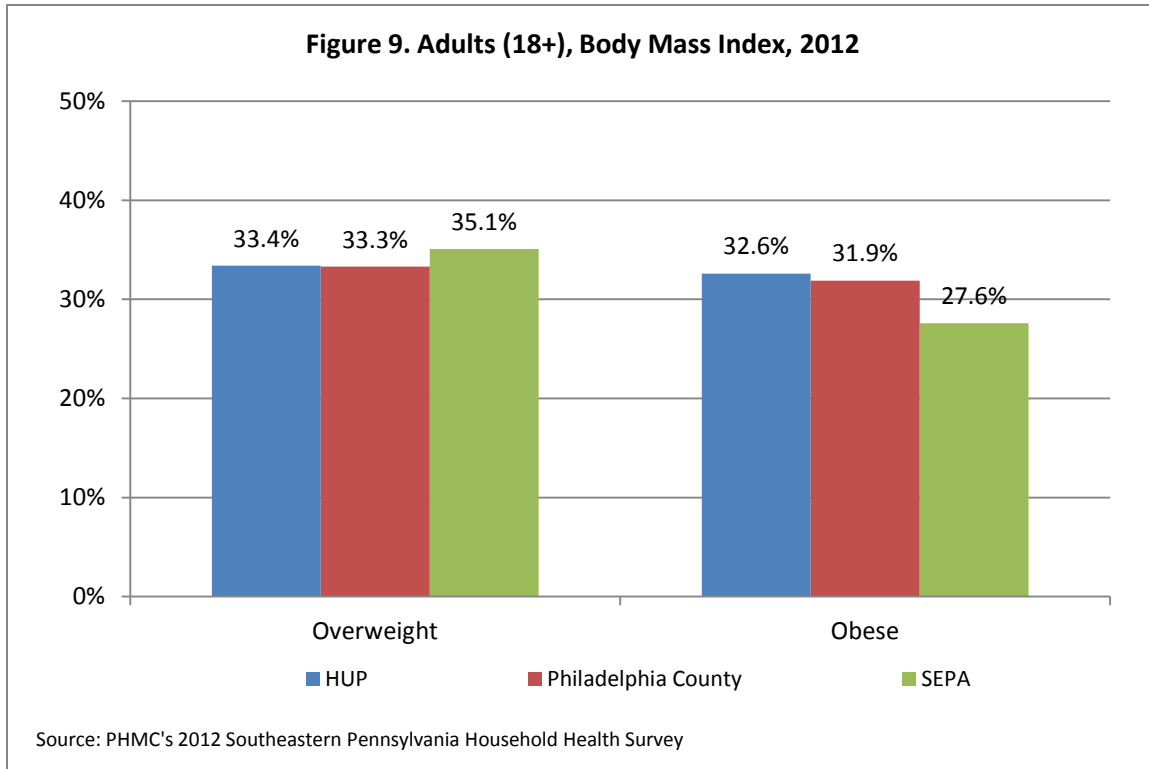

- More than one in seven (14.9%) adults in the service area has been diagnosed with diabetes; this percentage represents approximately 46,800 adults and is higher than the statewide percentage of 9.5% of adults diagnosed with diabetes.<sup>5</sup> **The percentage of adults in the service area with diabetes is higher than for the region as a whole (12.4%).**
- **More than one in five (20.8%) adults in the service area has asthma.** This percentage is higher than for Pennsylvania (12.9%)<sup>6</sup> and for SEPA (16%) as a whole. The percentage of adults with asthma in the service area is similar to Philadelphia County (19.4%).
- Seven percent (7.3%) of adults in the service area has had cancer at some point in their lives, representing 22,700 adults. **The percentage of adults who ever had cancer is similar to SEPA (8.7%).**
- **Nearly one-third (32.6%) of adults in the service area is obese and one-third (33.4%) of adults are overweight.** A similar percentage of adults are obese or overweight statewide (28.6% and 36.0%, respectively).<sup>7</sup>(Figure 9)

<sup>5</sup>2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

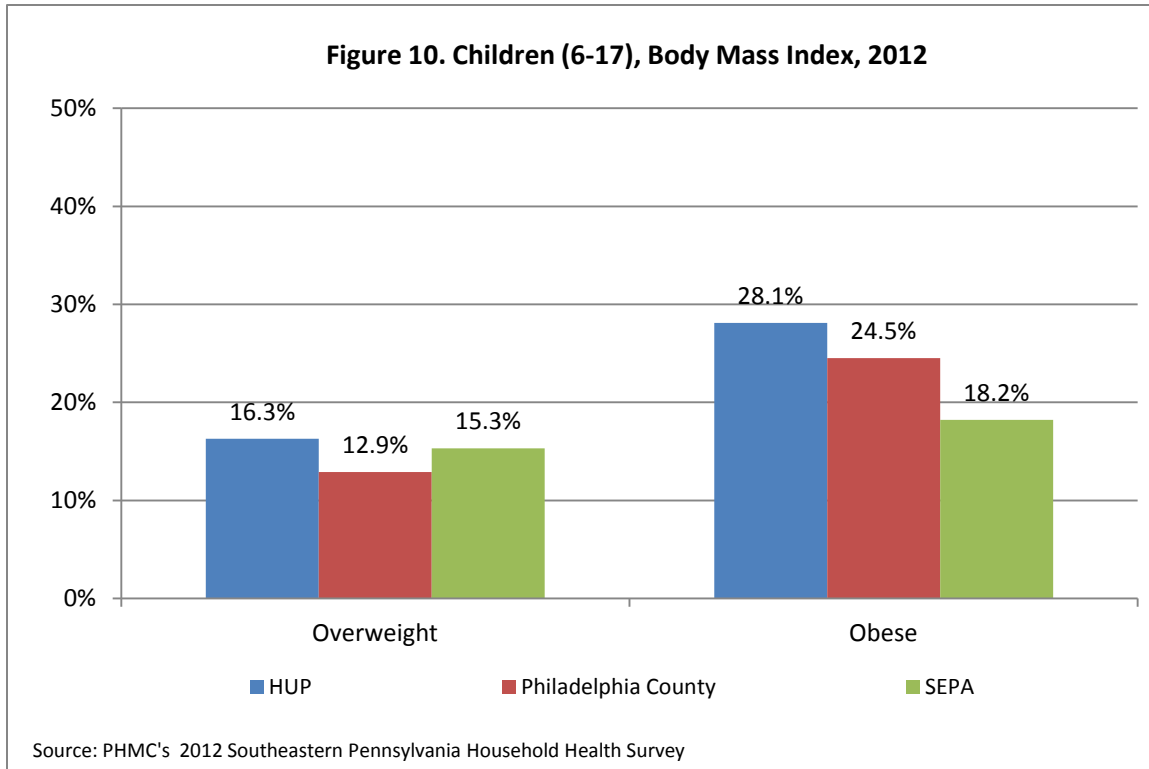

<sup>6</sup>2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

<sup>7</sup>2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

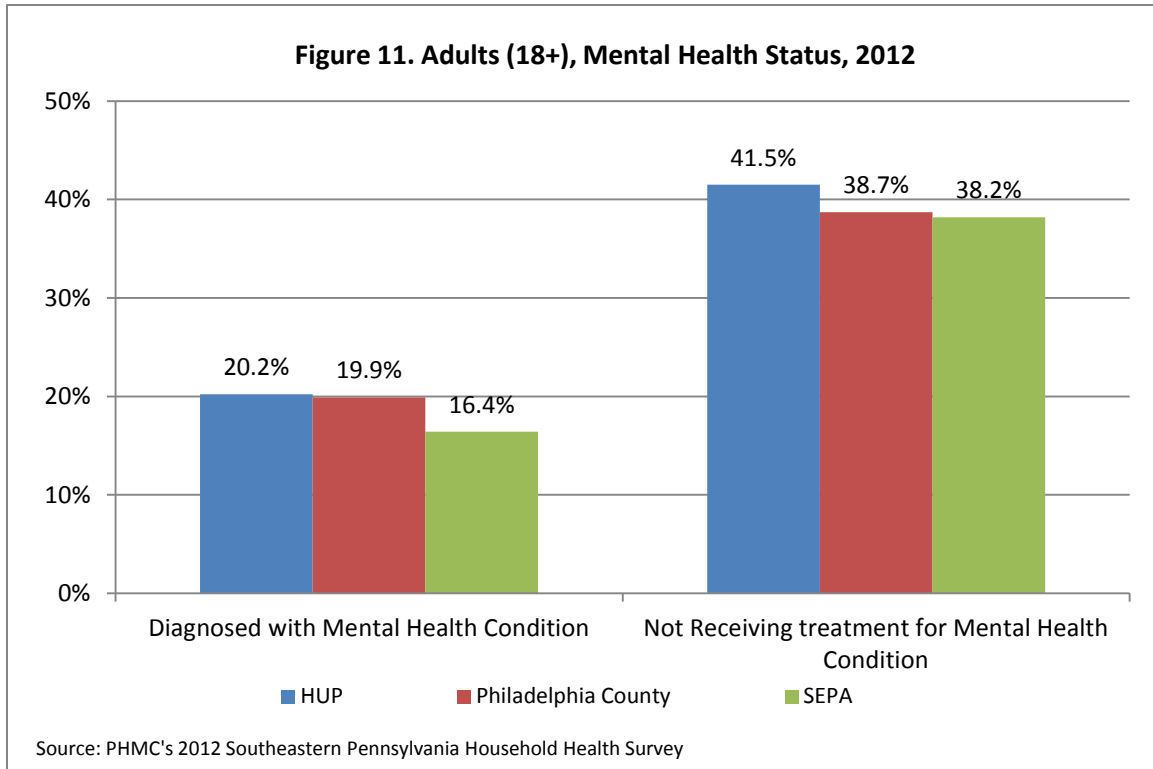

- More than one-quarter (28.1%) of children in the service area are obese and one in six (16.3%) are overweight. The percentage of obese children in the service area is higher compared to SEPA as a whole (18.2%). (Figure 10)

- **One in five (20.2%) adults in the service area has been diagnosed with a mental health condition;** this percentage represents 63,200 adults. Of those with a mental health condition, **more than four in ten (41.5%) are not receiving treatment for the condition.** (Figure 11)
  - Nearly one-quarter (24.5%) of older adults in the service area has signs of depression which are defined as having four or more depression symptom on a ten item scale. This percentage is higher than the region as a whole (14%).

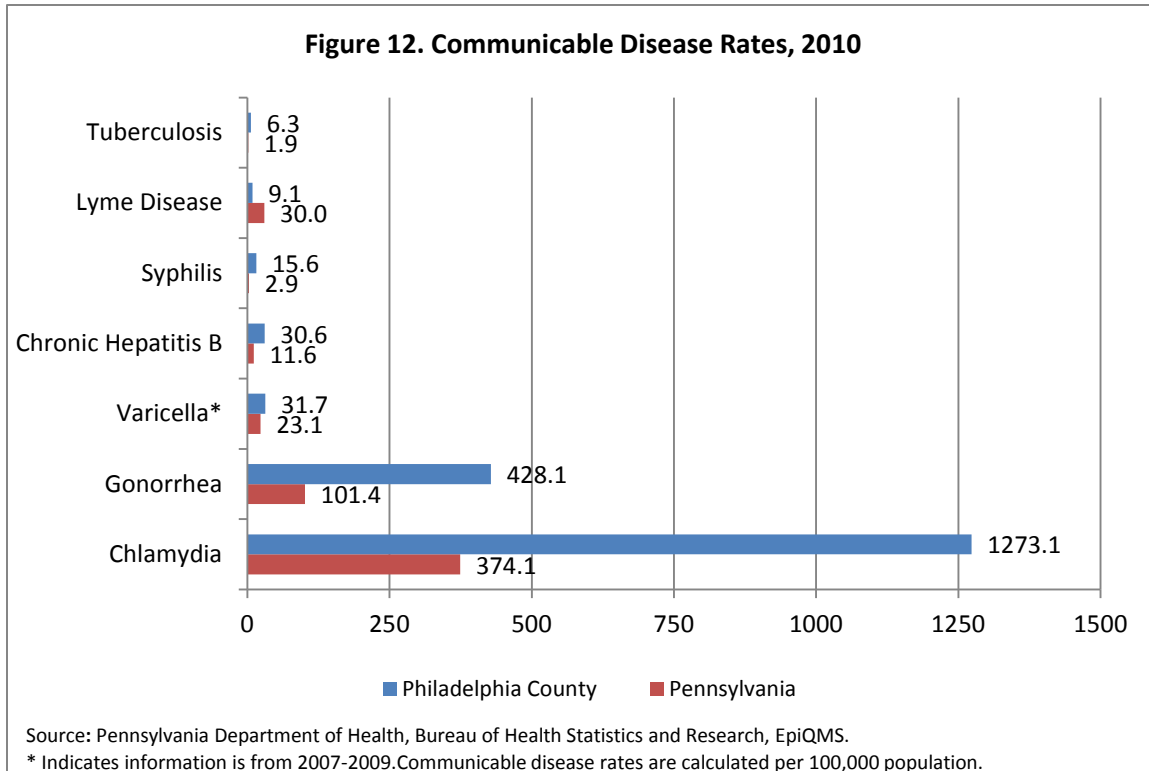

- Approximately 39,700 adults (12.8%) in the service area are in recovery for a substance abuse problem.

**Community members indicated that many HUP service area residents have trouble accessing mental health services.**

- Center City members stressed the need for mental health and physical health care to be better linked.
- West Philadelphia members reported that there is a long waiting list for low-income and uninsured populations citywide who need to access mental health services.
- The community health centers experience high turnover and often have no one to prescribe medications.
- Mentally ill adults are often shifted around, which causes gaps in services.

Communicable Diseases

The communicable disease rates for **chronic Hepatitis B, Tuberculosis, Varicella (chicken pox), Chlamydia, Gonorrhea, and Syphilis (primary and secondary)** in Philadelphia County are higher than state rates while the county rate for **Lyme Disease is lower** compared to the state rate (Figure 12). The county rate for Pertussis (whooping cough) is comparable to the state rate.

## Morbidity

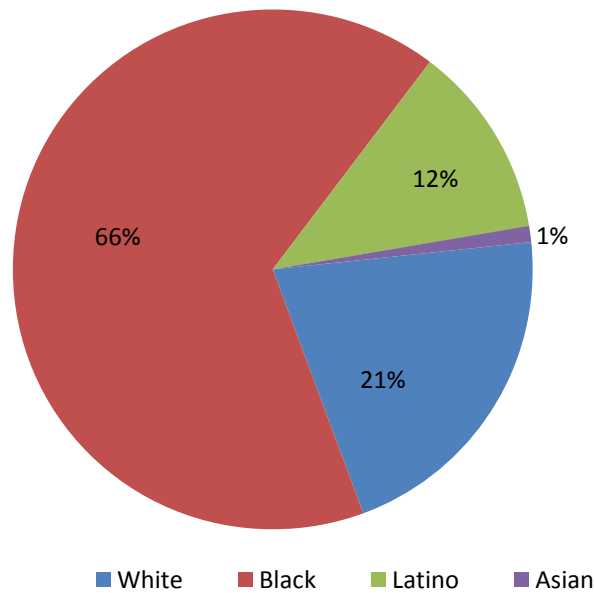

### *HIV and AIDS*

**In Philadelphia County, there are 16,234 individuals who are living with HIV, including AIDS, representing a prevalence rate of 1,121.6 cases per 100,000 population. This prevalence rate is five times higher than the state's rate (244.9).**

- Among Philadelphia residents who are living with HIV or AIDS, more than two-thirds (69%) are men.
- Two-thirds (66%) are Black, one-fifth (21%) are White, more than one-tenth (12%) are Latino, and 1% are Asian (Figure 13).

**Figure 13. Racial and Ethnic Distribution of Individuals Living with HIV or AIDS, Philadelphia County, 2008**

Source: Pennsylvania Department of Health, HIV/AIDS Investigation-Bureau of Epidemiology and American Community Survey.

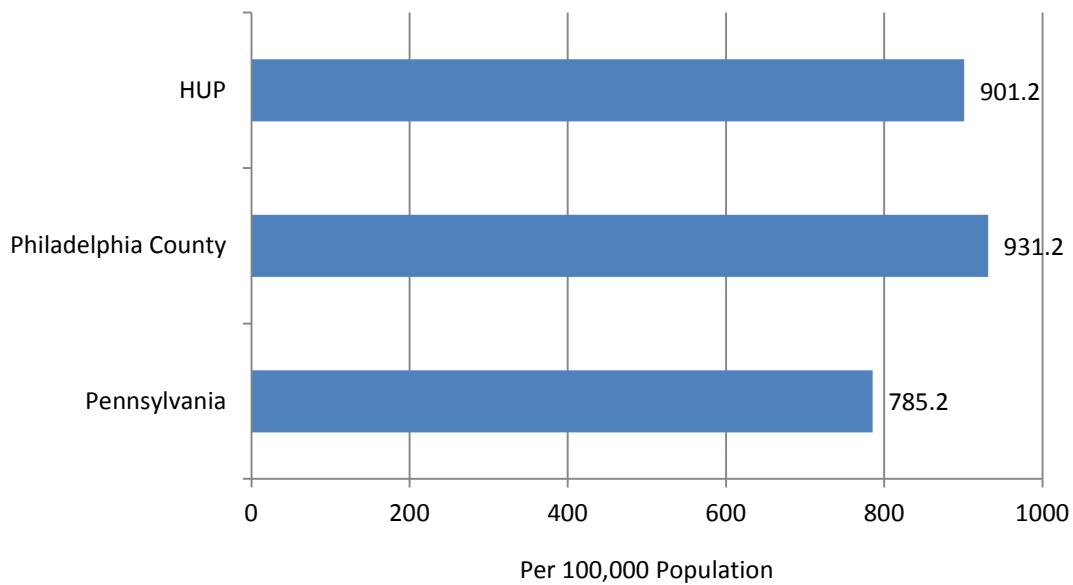

#### Overall Mortality

**The overall death rate in the HUP service area (901.2 deaths per 100,000 population) is lower than Philadelphia County rate (931.2) but higher than the Pennsylvania rate (785.2) (Figure 14).**

- **Heart disease is the leading cause of death in the service area (232.7), the county (232.2), and the state (203.2).**
- The other four leading causes of death in the service area are: all forms of cancer (205.4), lung cancer (59.5), stroke (46.6), and female breast cancer (25.9).
- The other four leading causes of death in the county are similar, with generally comparable rates.

**Figure 14. Average Annualized Overall Mortality Rate, 2005-2008**

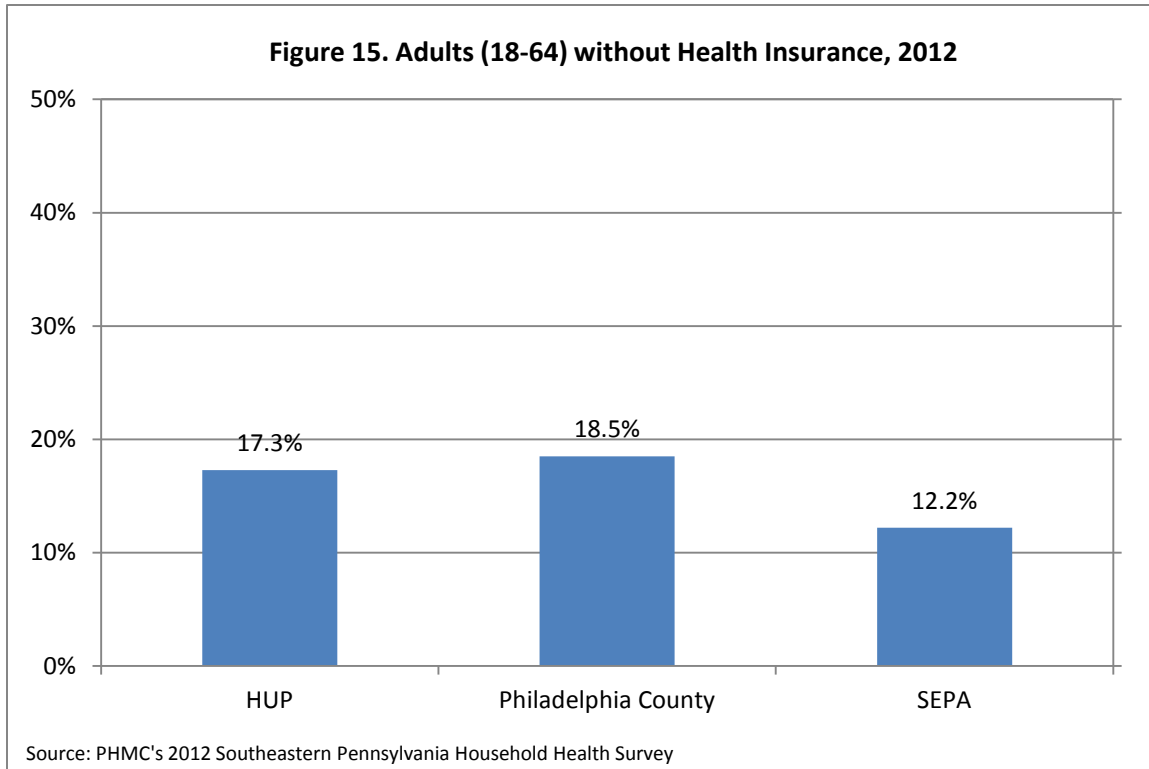

Source: Pennsylvania Department of Health, Bureau of Health Statistics and Research. Calculations prepared by PHMC.

### ***Access and Barriers to Care***

#### Health Insurance Status

Having health insurance and a regular place to go when sick are important in ensuring continuity of care over time. The majority of adults (82.7%) in the Hospital of the University of Pennsylvania service area have health insurance coverage. However, a sizable percentage of adults do not have any private or public health insurance; **17.3% of adults ages 18-64 in the service area are uninsured, representing 43,700 uninsured adults** (Figure 15).

- The percentage of uninsured adults in the service area has remained the same since 2010 (**16.2% and 17.3%, respectively**).
- The percentage of adults in the service area without insurance is similar to adults ages 18-64 in Philadelphia (18.5%) but is higher than SEPA (12.2%) as a whole.

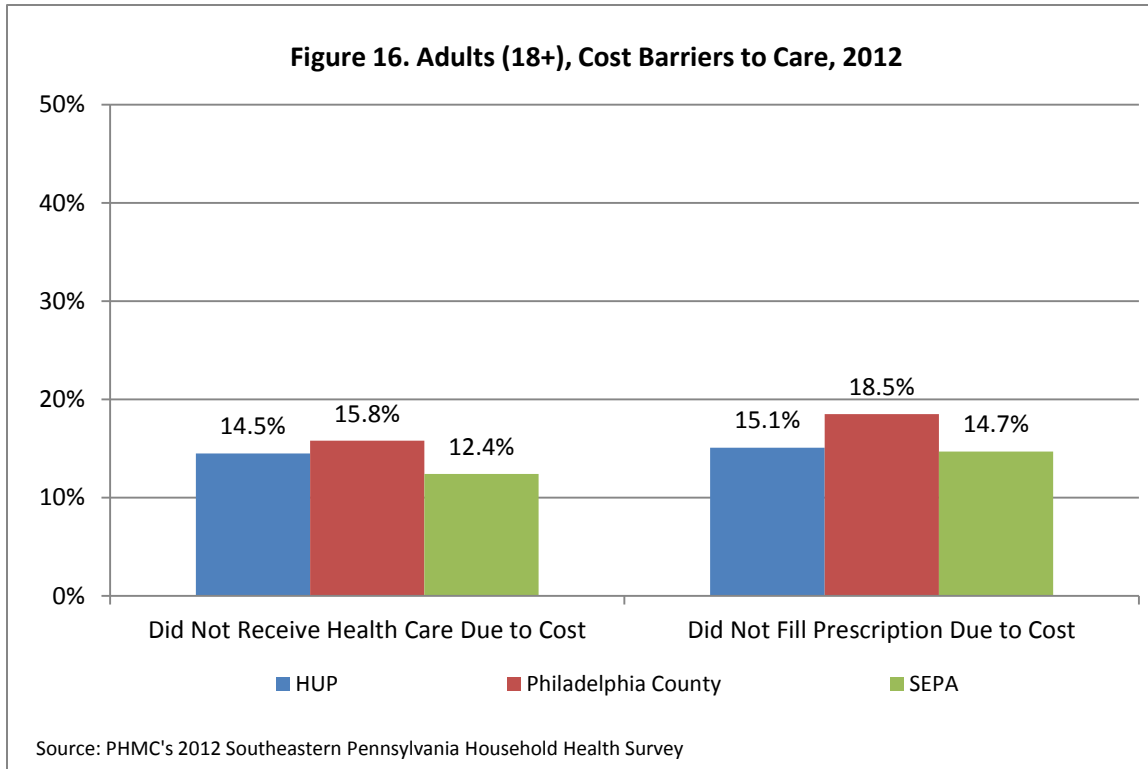

Prescription Drug Coverage

- **Nearly one-quarter (23.9%) of adults in the service area does not have prescription drug coverage.** This percentage represents 74,000 adults without this drug coverage.
- The percentage of adults without prescription drug coverage in the service area is similar to the percentage without prescription coverage in Philadelphia (24.5%) County but is higher than the SEPA (18.6%) as a whole.

Economic Barriers

- With or without health insurance, **45,400 adults in the service area are unable to get needed care due to the cost of that care;** 14.5% of adults reported that there was a time in the past year when they needed healthcare, but did not receive it due to the cost (Figure 16).
- **About 47,100 adults in service area (15.1%) were prescribed a medication but did not fill the prescription due to cost in the past year** (Figure 16).
- **More than one-quarter (26.7%) adults in the service area in 2010 did not get dental care due to the cost of the visit.** This percentage is similar to adults in Philadelphia (26.8%) and SEPA (24.1%).

Community members in Center City reported on several services with which residents have access problems. These include:

- **Services related to childhood obesity;**
- **Dental care for uninsured youth and adults; and**
- **Coverage for prescriptions and hearing aids.**

Members of the West Philadelphia community meeting identified a number of other services which residents have difficult accessing, which include:

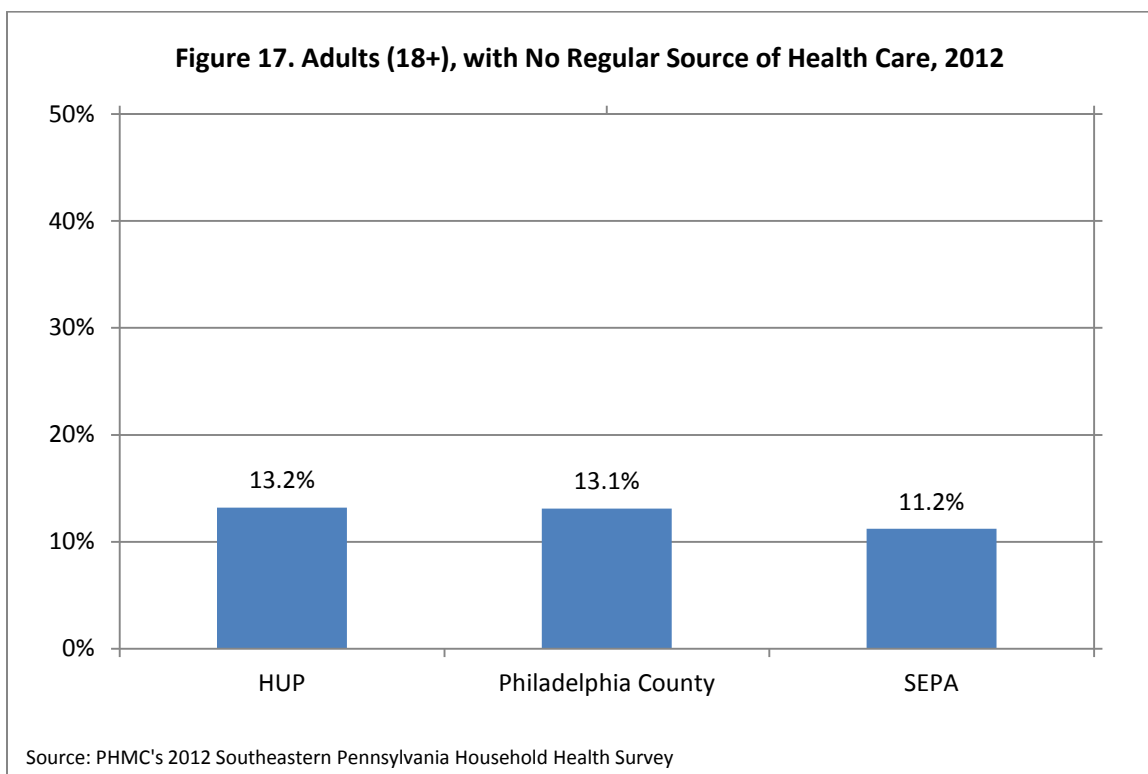

- **Specialty care**
  - Uninsured adults citywide have trouble getting follow-up specialty care. Neurology appointments are particularly difficult to secure for residents, as the wait can be months long.
- **Drug and alcohol treatment**
  - In West Philadelphia, there is a shortage of drug and alcohol treatment providers for low-income populations. There is an especially high need for treatment programs for individuals with both mental health and substance use disorders.
- **Health education**
  - Funds for school-based health education have been drastically cut, which limits the breadth of topics covered in school. Parents may not provide the necessary education. Food pantries used to provide education in conjunction with their service, but the funding was eliminated.

### Source of Care

Having a regular source of care is important since people who have a regular source of care are more likely to seek care when they are sick compared with those who do not.

- In the Hospital of the University of Pennsylvania service area, **more than one in eight (13.2%) adults do not have a regular source of care; this percentage represents approximately 41,300 adults (Figure 17).**
  - Most children (98%) in the service area have a regular source of care. Only approximately 1,640 children in the service area do not have a regular source of care.
- Among adults with a regular source of care, two-thirds (66.1%) goes to a private doctor's office, 13.4% go to a community clinic, 11.7% go to a hospital outpatient clinic, and 4.4% go to a hospital emergency room.

**Members of both community groups cited long wait lists, neighborhood safety, and Medical Assistance budget cuts as primary barriers to care.**

- **Wait lists**
  - Center City community members reported that it can take up to ten weeks for psychiatric intake, which ultimately discourages people from getting help. Members of the West community group said that there are long wait lists at the city's health centers for low income adults seeking primary care. Many adults do even try to get an appointment because they perceive the wait times to be too long.

- **Neighborhood safety**
  - West Philadelphia community members discussed the impact of violence in West and Southwest neighborhoods of the city, which often deters residents from leaving their homes when in need of help.
  - Additionally, the violence negatively impacts people’s mental health and police surveillance only leads to an untrusting attitude among this population.
  - Center City community members also shared that high crime impedes residents from traveling, playing outdoors, and causes fear and distrust among neighbors.
- **Medical Assistance cuts**
  - Cuts in Medical Assistance have resulted in many losing their insurance coverage. While people were supposed to be reinstated, many did not, and both groups said that pregnant women and children particularly suffered.

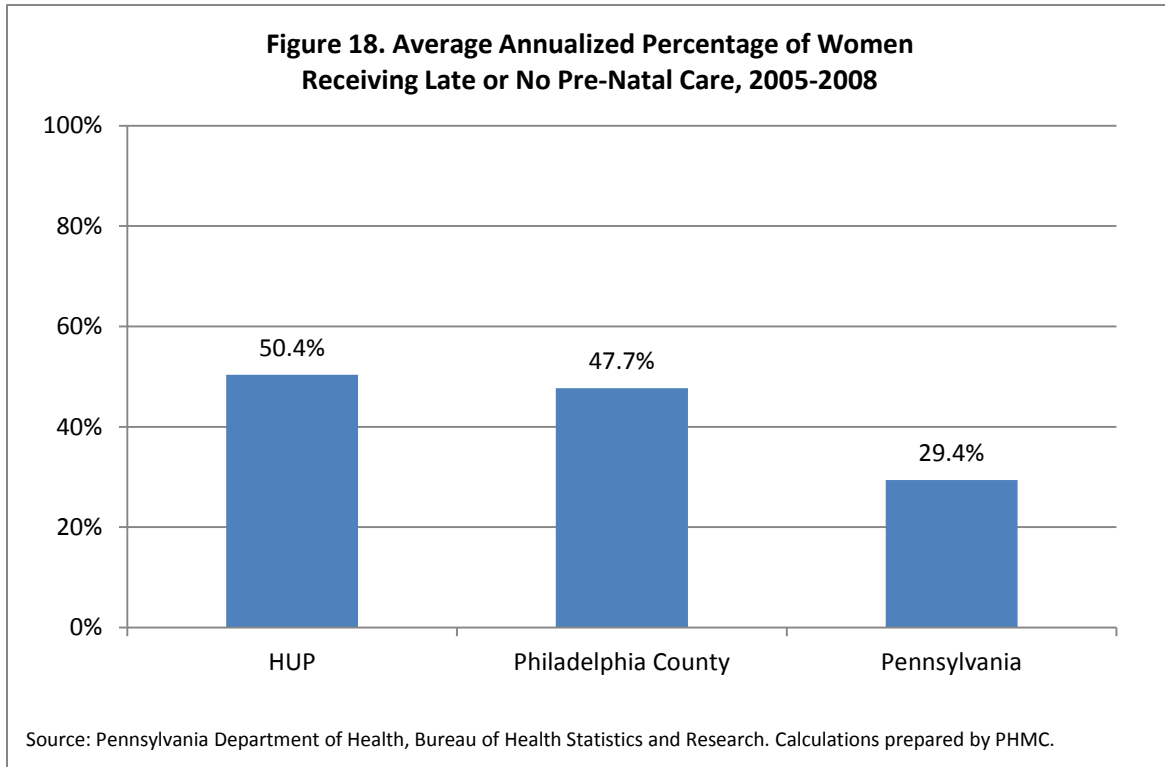

The Center City community members identified several other barriers that caused problems with access, including:

- Transportation;
- Language and culture; and
- The complexity of the health care system, which results in a strong need for “patient navigators’ to help individuals find appropriate care.

#### Pre-Natal Care

Receiving pre-natal care during the first trimester of pregnancy can help ensure that health concerns are identified and addressed in a timely manner.

- **One-half of women in HUP’s service area (49.6%) receive early pre-natal care**, which is comparable with the Philadelphia County average (52.3%) and far below the state average (70.6%).
- **In fact, one-half of women in the service area (50.4%) receive pre-natal care during the second or third trimester of pregnancy or no pre-natal care at all, representing an average of more than 2,500 women annually in the service area (Figure18).**
- Nearly six in ten women of another race in the service area (57.0%) receive late or no pre-natal care compared to 29.7% of White women. The percentage of women of another race receiving late or no pre-natal care is higher in the service area compared with the county (50.5%) and the state (45.9%).

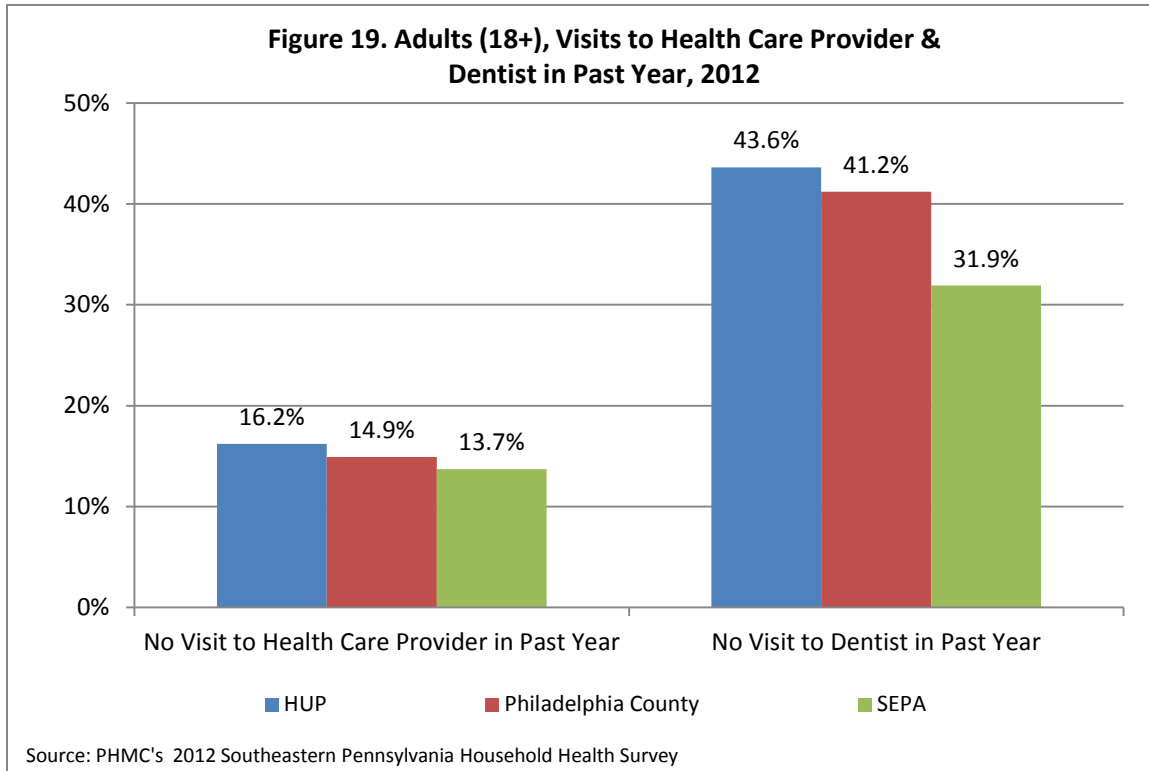

### **Utilization of Services**

Regular health screenings can help identify health problems before they start. Early detection can improve chances for treatment and cure and help individuals to live longer, healthier lives. **In the Hospital of the University of Pennsylvania service area, one in six (16.2%) adults did not visit a health care provider in the past year; this percentage represents 48,200 adults.** (Figure 19)

#### Dental Visit

- More than four in ten (43.6%) adults in the service area did not visit a dentist in the past year; this percentage represents approximately 136,400 adults. This percentage is higher than SEPA (31.9%) as a whole.
- The percentage of adults (39.4%) who did not visit a dentist in 2012 in the service area is higher than for adults statewide (29.0%).<sup>8</sup>(Figure 19)
  - More than one in seven (15.6%) children in the service area did not visit a dentist in the past year.

<sup>8</sup>2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

### Recommended Screenings

The following screenings have been recommended for preventative health for adults. As described below, many adults in the service area are not utilizing these services.

#### *Blood Pressure*

- **One in nine (11.2%) adults in the service area did not have a blood pressure test in the past year; this percentage represents 34,800 adults.** The percentage of adults who did not have a blood pressure test in the past year in the service area is similar to Philadelphia (11.5%) and is higher than SEPA (10.4%).

#### *Colonoscopy*

Regular screenings beginning at age 50 are fundamental in preventing colorectal cancer.

- **More than one in seven (15.7%) adults 50 years of age and older in the service area did not have a colonoscopy in the past ten years.** Statewide, 65% of adults age 50 and over have had a colon cancer screening in the past ten years.<sup>9</sup>

#### *Pap Smear Test*

- **Four in ten (39.6%) women in the service area did not receive a Pap Smear test in the past year.** This percentage represents approximately 71,100 women. The percentage of women who have not received a Pap smear test in the past year is similar to women in Philadelphia (40.9%) and SEPA as a whole (41.9%). (Figure 20)

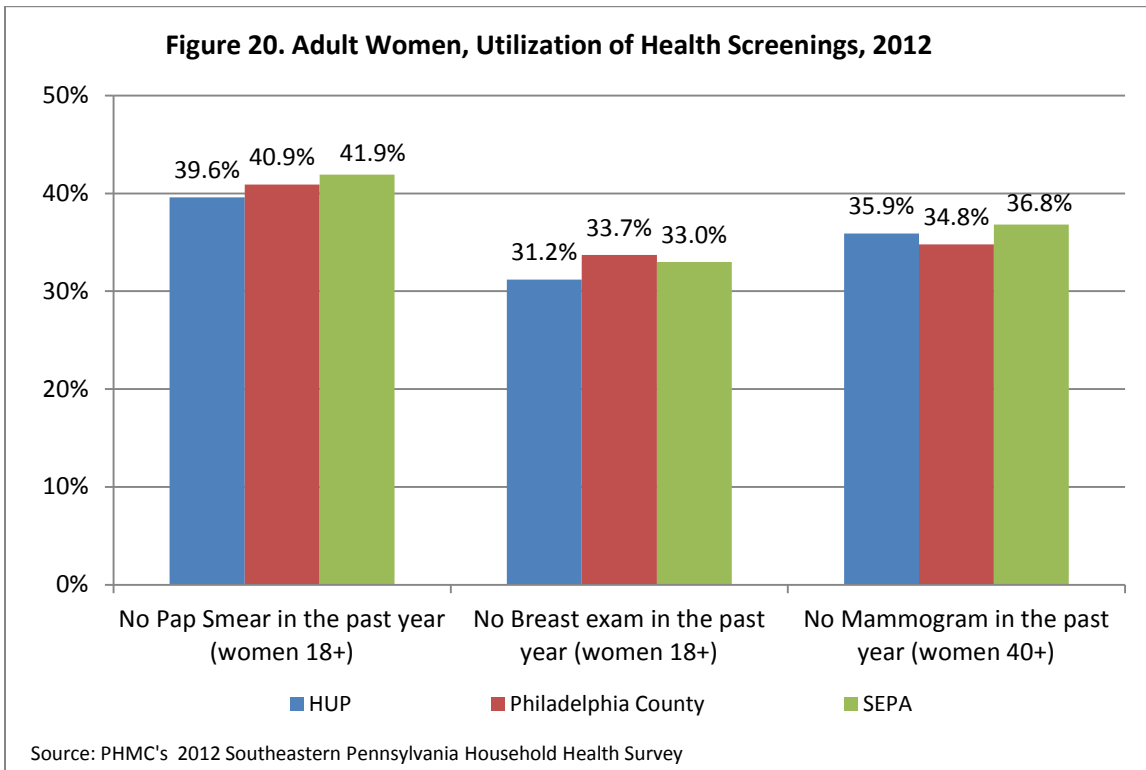

<sup>9</sup>2010 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

*Mammogram*

The American Cancer Society recommends annual mammograms beginning at age 40 for women in good health.

- More than one-third (35.9%) of women ages 40 or older in the service area is not receiving this screening annually. This is lower than the statewide percentage (42.0%)<sup>10</sup> but similar to the SEPA region (36.8%). (Figure 20)

**Both the West and Center City community members also discussed needs surrounding Obstetrical/Gynecological services.**

- West Philadelphia members described a lack of hospital-based OB/GYN services for low-income women, which creates a significant barrier to timely prenatal care. Many low-income women have to wait eight to ten weeks for an initial prenatal appointment at a hospital. Many women prefer hospital-based prenatal and obstetrical care to free care provided at the health centers, due to a perception that hospital-based care is better.
- Center City members conferred that there is a decreasing number of hospitals that provide OB/GYN care and that a significant number of women do not receive family planning services.

*PSA or Rectal Exams for Prostate Cancer*

- **More than four in ten (45.8%) men ages 45 years and over in the service area did not have a PSA or rectal exam for prostate cancer in the past year.** The percentage of men who have not had a prostate exam in the past year is similar to SEPA as a whole (45.4%). Statewide, 53% of men ages 50 and over did not have this test.

<sup>10</sup>2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

## ***Health Behaviors***

### Nutrition

According to the USDA's MyPlate food guidelines, adults should eat four to five servings of fruits and vegetables daily.<sup>11</sup>

- In the service area, only one in five (20.0%) of adults **reach this recommended goal**. Nationally, less than three-quarters of adults (74%) eat three or more servings of fruits and vegetables daily.<sup>12</sup>
- Fast foods are high in unhealthy calories, saturated fats, sugar, and salt. In the service area, more than one in six (17.7%) adults eats fast food two or more times per week.

### Exercise

The U.S. Department of Health and Human Services' 2008 Physical Activity Guidelines for Americans recommends that adults (ages 18-64) get two and a half hours of moderate aerobic physical activity each week.<sup>13</sup>

- Slightly more than one in ten (11.8%) adults in the in the service area does not participate in any exercise. More than one-half (56.8%) of adults exercise three or more days a week as recommended.

### Tobacco Use

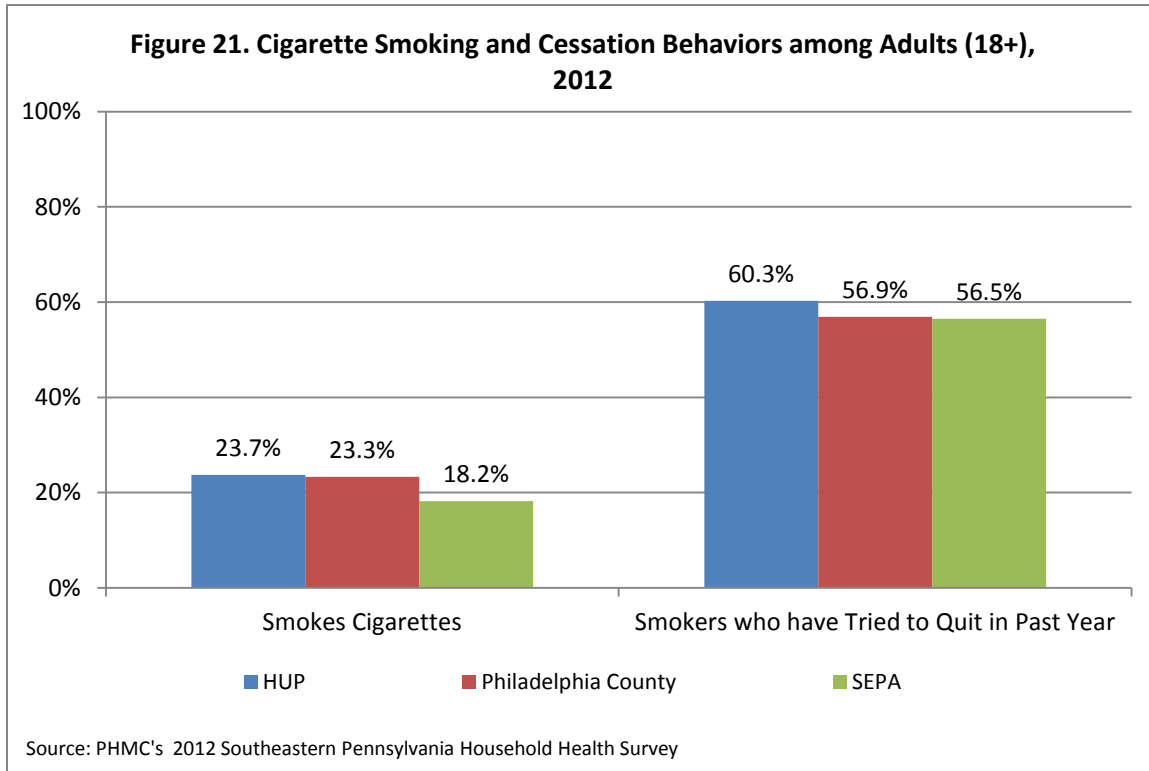

- **Nearly one-quarter (23.7%) of adults in the service area currently smokes; this percentage is similar to the smoking rate statewide (22.4%) and to SEPA as a whole (18.2%).** (Figure 21)
- **More than one-half (56.2%) of adults who smoke in the service area tried to quit in the past year.**
- The percentage of adults in the service area who smoke has remained steady since 2010; in 2010, 25.0% of adults smoked cigarettes.

---

<sup>11</sup>The U.S. Department of Agriculture, (2011). Dietary Guidelines Consumer Brochure. Retrieved online on October 23, 2012 at <http://www.choosemyplate.gov/food-groups/downloads/MyPlate/DG2010Brochure.pdf>

<sup>13</sup>U.S. Department of Health and Human Services. 2008 Physical Activity Guidelines for Americans, 2008.

### Alcohol Consumption

According to the Centers for Disease Control and Prevention (CDC), binge drinking is a common pattern of excessive alcohol use in the U.S. and is defined as five or more drinks on one occasion.<sup>14</sup>

- **More than one-third (36.3%) of adults in the service area participated in binge drinking on one or more occasions in the past month.** The binge drinking percentage is higher than the statewide percentage of 18.3%.<sup>15</sup>

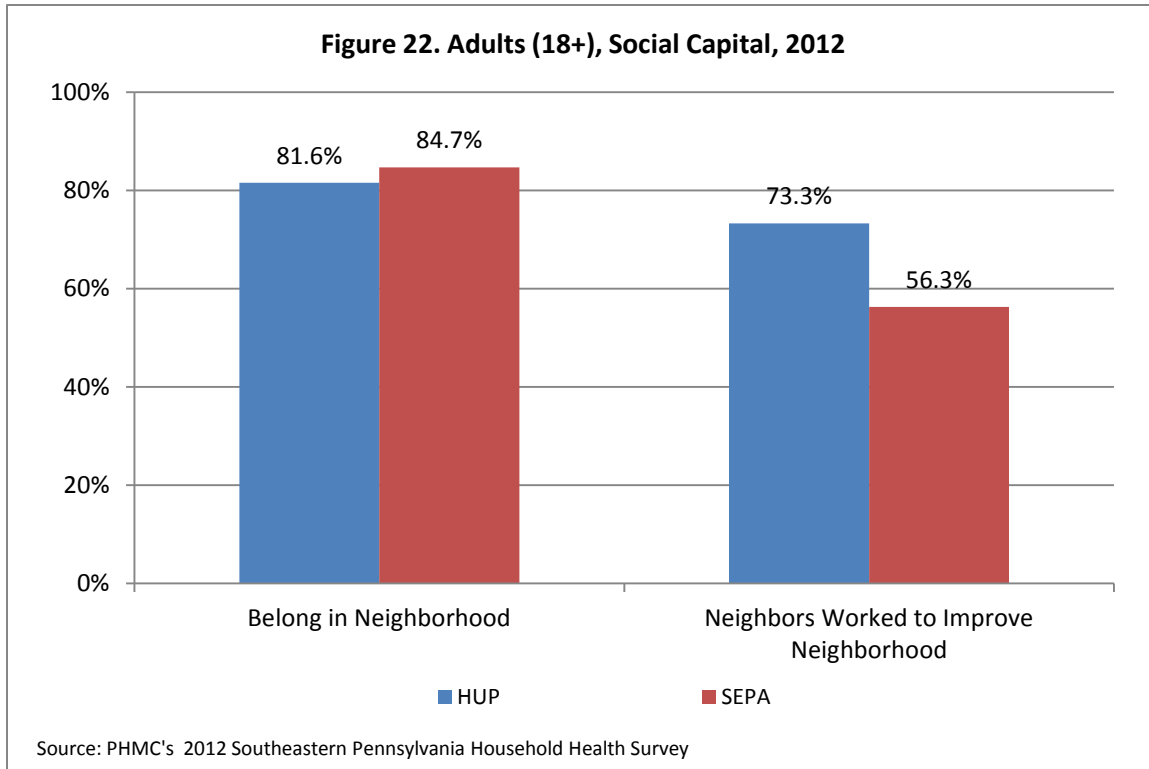

### ***Social Capital and the Neighborhood***

Neighborhood factors have important roles in the overall health and well-being of residents in the Hospital of the University of Pennsylvania service area. Social capital is one measure used to understand an individual's neighborhood and role in that neighborhood.

- Eight in ten (81.6%) adults in the service area feel like they belong in their neighborhood, and nearly three-quarters (73.3%) have worked on a community project to improve the area. (Figure 22)

<sup>14</sup>U.S. Centers for Disease Control and Prevention. Fact Sheets – Binge Drinking – Alcohol (2010).

<sup>15</sup> 2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

### ***Best Methods for Sharing Health Information***

**Both community groups recommended using one-on-one outreach through navigators, advocates, or other persons** to best reach individuals and help them access services. West Philadelphia community members reported that the Health Department previously had funding for a health ambassador program, which has since been cut.

West Philadelphia community members also suggested the following avenues of communication:

- Churches;
- Town meetings and schools;
- Stores, such as braiding shops, hair salons, barber shops, food pantries, laundromats;
- Social media, including twitter, Facebook, texting; and
- Advertisements on day-time television.

They added that a combination of methods is needed to reach various audiences and that messages must be available in multiple languages.

Center City community members recommended that social media and television advertising be used to reach various populations.

## HEALTH NEEDS OF SPECIAL POPULATIONS

One of the goals of this needs assessment is to identify the health needs of special populations across the Hospital of the University of Pennsylvania service area. The following section focuses on the health status and access to care needs of special populations in the service area.

### Health Status and Chronic Health Conditions

- Within the service area, nearly four in ten (38.4%) of poor adults (those living below 150% of the Federal Poverty Level) are in fair or poor health compared to 15.1% non-poor adults. More than one-third of Latino (31.8%) adults, 28.7% of Black and 12.3% of White adults are in fair or poor health.
- Poor adults (49.4%) in the service area are more likely to have high blood pressure compared to non-poor (33.4%) adults. In the service area, 48.3% of Black adults and 36.2% of Latino adults have high blood pressure. Approximately one-quarter (24.0%) of White adults have high blood pressure.
- Poor adults are more likely to have been diagnosed with a mental health condition compared to the non-poor (25.4% versus 13.5%, respectively).

### Insurance Status

- Nearly one-quarter (24.0%) of poor adults in the service area is uninsured compared to one in eight (12.8%) non-poor adults. Nearly one in five Black (19.2%) and Latino (17.6%) adults are uninsured compared to 12.0% of White adults.

### Additional Needs

Both community groups referred to undocumented populations as having particular unmet needs.

- West Philadelphia community members specifically cited the large African populations from Liberia, Mali, the Ivory Coast, Ethiopia, and Sierra Leone as not getting the necessary health care services.

The West Philadelphia community members also cited the homeless, teens, and people with disabilities as groups with heightened access problems and who are in need of care.

Center City community members mentioned that the following groups have trouble accessing health care services and are in need of more care directed to them:

- Non-English speakers
- Youth aging out of the foster care system
- HIV-infected adults, as there is still stigma attached to this population
- Incarcerated individuals who have special needs when returning to society, including medications, transportation, and getting identification
- Substance-using adults

---

## IV. UNMET COMMUNITY HEALTH NEEDS

---

### UNMET NEEDS AND IDENTIFICATION PROCESS

The unmet health care needs for this service area were identified and prioritized by comparing the health status, access to care, health behaviors, and utilization of services for residents of the service area to results for the county and state and the Healthy People 2020 goals for the nation. In addition, for Household Health Survey measures, tests of significance were conducted to identify and prioritize unmet needs. Lastly, input from the community meeting participants was also used to further identify and prioritize unmet needs, local problems with access to care, and populations with special health care needs.

Several health status and specific disease indicators for the University of Pennsylvania service area are worse than the corresponding indicators for the region and/or for Healthy People 2020 goals and/or were identified by public health experts and other community meeting participants as reflecting priority unmet needs:

- In the Hospital of the University of Pennsylvania service area, three-quarters (77.1%) of adults rate their health as excellent, very good or good. However, more than one in five adults (22.9%) is in fair or poor health. This percentage is higher than the statewide average (16.8%)<sup>16</sup> and the percentage in fair or poor health for the SEPA region as a whole (16.1%).
- Nearly one-third (32.6%) of adults in the service area are obese and one-third (33.4%) of adults are overweight. One in five (20.2%) adults in the service area has been diagnosed with a mental health condition, and, of those with a mental health condition, more than four in ten (41.5%) are not receiving treatment for the condition.
- Heart disease is the leading cause of death in the service area (232.7). Nearly four in ten (39.1%) adults have been diagnosed with high blood pressure and more than one in seven (14.9%) adults in the service area has been diagnosed with diabetes. The percentage of adults in the service area with high blood pressure (39.1%) is **statistically significantly worse** than the percentage for SEPA (31.0%) ( $p < .001$ ). The percentage of adults in the service area with diabetes is higher than for the region (12.4%).
- Several other indicators are **statistically significantly worse** ( $p < .001$ ) than the remainder of SEPA. These areas should be prioritized for improvement and include:
  - Adults diagnosed with asthma;
  - Uninsured adults and adults without prescription drug coverage;
  - Cigarette smoking among adults; and
  - Dental care for adults and children.
- Therefore, the unmet health care needs of the residents of this service area include the following prioritized needs:

---

<sup>16</sup>2011 Behavioral Risks of Pennsylvania Adults, PA Department of Health.

- Access to, and coordination of, primary, preventive and dental care for adults, particularly those individuals living in poverty; and
- Access to dental care, prescription coverage, and specialty care for adults and children.

Priority unmet needs in this area also include increased educational programs to address:

- Cultural and language barriers, particularly among non-English speakers, Asian and Latino populations;
- Navigation of the complex health care system;
- Heart disease and cancer for all residents;
- Smoking prevention, interventions, and cessation programs;
- Behavioral health conditions and treatment options for adults, teens, low-income and uninsured individuals;
- Neighborhood safety;
- Long waiting lists for services; and
- Women's health needs, specifically obstetrical care and routine cancer screenings.

However, for several household health indicators, the service area was **statistically significantly better** than compared to the remainder of the region. These indicators include the percentage of adults who visited a healthcare provider in the past year, and the percentage of adults (age 50+) who received a Colonoscopy or Sigmoidoscopy in the past year.

Many of these unmet needs are already being addressed in the service area by the hospital, other health care providers, government, and local non-profits. In addition, many of these unmet needs are not within the hospital's mission. This list should be used to assist the hospital in addressing these needs in their needs assessment implementation plan.

## **APPENDIX A: COMMUNITY MEETING ATTENDEES**

**Center City Community Meeting  
List of Participants**

July 24, 2012  
(n=12)
